Erratum

In the article by Fassoulaki et al., entitled “EMLA Reduces Acute and Chronic Pain After Breast Surgery for Cancer,” which appeared in the July–August 2000 issue, volume 25, no. 4, pp 350–355, a correction should be noted. On page 352, in line 7 of the Results section, the sentence which reads “One patient in the EMLA group developed cutaneous allergy; . . .” should be corrected as follows: “One patient in the control group developed cutaneous allergy; . . .”.
