Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.
Correction

Neutralization of SARS-CoV-2 by Destruction of the Prefusion Spike

(Cell Host & Microbe 28, 445–454.e1–e6, September 9, 2020)
In the version of this article published online June 19, 2020, there was a spelling error in author Piyada Supasa’s name, and a spike ectodomain was incorrectly stated to contain an His-6 tag instead of an His-8 tag. These errors have since been corrected online, and the correct version of this article will appear in this month’s issue. The authors sincerely regret these errors and any confusion that may have resulted.
