AopP

Isolation sources: veterinary

AopS

Isolation sources: sick veterinary, veterinary

AopX

Isolation sources: veterinary, wound, environment, sick veterinary, feces, blood

Ati2

Isolation sources: veterinary
S2 Figure. Phylogenies for the putative effectors. The depicted root corresponds to a most parsimonious DTL reconciliation. Numbers give percent bootstrap support calculated from 1000 samples using RAxML (GTR+GAMMA+I model).
