Table 2: The mean values of isolates 296 for the individual isolates

| Treatment             | Sensitivity | Intermediate | Resistance |
|-----------------------|-------------|--------------|------------|
| Tetracycline          | 30ug/piece  |              |            |
| Doxycycline DX       | 30ug/piece  |              |            |
| Gentamicin GM        | 10ug/piece  |              |            |
| Trimethoprim (TMP)   | 5ug/piece   |              |            |

Note: The table above presents the mean values for isolates 296, categorized by treatment and resistance levels. The sensitivity, intermediate, and resistance levels are indicated for each treatment.
