Supplemental Online Content

Murano Y, Shoji H, Ikeda N, et al. Analysis of factors associated with body mass index at ages 18 and 36 months among infants born extremely preterm. *JAMA Netw Open*. 2021;4(10):e2128555. doi:10.1001/jamanetworkopen.2021.28555

**eTable.** Characteristics Among Children With Data and Without Data

This supplemental material has been provided by the authors to give readers additional information about their work.
**eTable.** Characteristics Among Children With Data and Without Data

| Variable                   | 18- or 36-month data available (8838) | Neither 18- nor 36-month data available (7952) | P     |
|----------------------------|---------------------------------------|-----------------------------------------------|-------|
| Gestational age (weeks)    | 26.1 ± 1.58                           | 26.2 ± 1.59                                   | 0.04  |
| Birth weight at birth (g)  | 850.2 ± 226.1                         | 869.8 ± 229.7                                 | < 0.05|
| Body length at birth (cm)  | 33.2 ± 3.3                            | 33.4 ± 3.2                                    | < 0.05|
| IUGR (%)                   | 1956 (22.1)                           | 1607 (20.8)                                   | < 0.05|
| Maternal age               | 31.3 ± 5.3                            | 30.9 ± 5.5                                    | < 0.05|
| Multiple pregnancy (%)     | 1749 (19.8)                           | 1686 (21.2)                                   | 0.08  |
| Sex (boys) (%)             | 4672 (52.9)                           | 4203 (52.9)                                   | 1.00  |
| Parity more than 1 (%)     | 4195/ 8785 (47.8)                     | 3873/ 7808 (49.6)                             | 0.06  |
| PIH (%)                    | 1152/ 8803 (13.1)                     | 904/ 7809 (11.6)                              | 0.013 |
| LCC                       | 1252/ 8742 (14.3)                     | 967/ 7774 (12.4)                              | 0.002 |
| CLD                       | 5357/ 8797 (60.9)                     | 4612/ 7787 (59.2)                             | 0.09  |
| NEC                       | 116/ 8755 (1.3)                       | 155/ 7802 (2.0)                               | 0.004 |
| IVH                       | 1605/ 8798 (18.2)                     | 1473/ 7831 (18.8)                             | 0.64  |
