Corrected article: Int J Biol Sci 2022; 18(1): 30-42. doi: 10.7150/ijbs.65255

After the publication of our article, we noted one error in Fig. 1B. The Kaplan-Meier survival curve is about neuroblastoma instead of osteosarcoma. After careful examination, we confirmed that this error was caused by carelessness when we used the R2 database (https://hgserver1.amc.nl/cgi-bin/r2/main.cgi). The corrected Fig.1B is shown as follows.
Additionally, the description of Fig. 1B was changed, as shown follows: “A cohort (GSE42352) of 88 patients with survival data was used for analysis. By Kaplan-Meier curve analysis, we revealed that several IRF family members had an association with OS patients’ prognosis (Fig. 1B). Interestingly, higher IRF7 expression was inclined to predict a better prognosis in OS patients.”
