Supplementary Figure 5. Stem cell memory gene profile and marker expression.

(A) Gene set enrichment analysis performed using RNA-seq data for CAR-T and FF CAR-iTSCM cells (gene set: DEGs between T_{SCM} and T_{CM} or T_{SCM}/T_{CM} and T_{PEX} as reported by Galletti et al., *Nat Immunol*, 2020[37]).

(B) Representative FACS profile of CD39 and CD69 expression on CAR-T cells, FC CAR-iTSCM cells, and FF CAR-iTSCM cells.
