Table S1: General characteristic of included patients.

| Variables               | Total | EBV+ | EBV- |
|-------------------------|-------|------|------|
| Age (median, range)     | 9 (4-15) | 8 (4-15) | 11 (5-14) |
| **Gender**              |       |      |      |
| Male                    | 34    | 26   | 8    |
| Female                  | 1     | 0    | 1    |
| **Histological Subtype**|       |      |      |
| Nodular sclerosis       | 7     | 4    | 3    |
| Mixed cellularity       | 23    | 20   | 3    |
| Others (LR and LD)      | 5     | 2    | 3    |

Abbreviations: LR, lymphocyte rich; LD, Lymphocyte depletion
