Supplemental Figure S1. Local delivery of pharmacological agents does not affect levels of total rpS6. A, Immunostaining for total rpS6 in a section within the wortmannin infusion area. B, High-magnification image of A. C, Immunostaining for total rpS6 in a section within the LY294002 infusion area. D, High-magnification image of C. E, Immunostaining for total rpS6 in a section within the U0126 infusion area. F, High-magnification image of E. G, Immunostaining for total rpS6 in a section within the rapamycin infusion area. H, High-magnification of G. I, Immunostaining for total rpS6 in a section within the SL0101-1 infusion area. J, High-magnification image of I. K, Immunostaining for total rpS6 in a section within the PF4708671 infusion area. L, High-magnification image of K. Scale bars: A, 200μm; B, 50μm.
