Supplementary Figure 1. Strategy for innate lymphoid cells (ILCs)

Representative flow cytometry plots of liver CD45+ Live & Dead- Lin- CD127+ RORg- GATA-3- T-bet+ ILC1s, CD45+ Live & Dead- Lin- CD127+ RORg+ T-bet- ILC3s and CD45+ Live & Dead- Lin- CD127+ RORg+ T-bet+ T-bet positive ILC3s in each group at 20-weeks of age.

Supplementary Fig. 1
Supplementary Figure 2. Strategy for macrophages

Representative flow cytometry plots of WAT CD45+ F4/80+ CD206- CD11c+ M1 macrophages and CD45+ F4/80+ CD206+ CD11c- M2 macrophages in each group at 20 weeks of age.
The top 20 gut microbial genera are shown. Relative abundance of gut microbiota in the three groups was compared using one-way ANOVA.
