Supplementary Figure 2. Transcription factors in CD4+ T cells of GlpQ-immunized mice. C57BL/6N mice were primed and boosted with either non-adjuvanted or adjuvanted GlpQ. Seven days after the boost, splenocytes were isolated and stained for Th1- (Tbet), Th2- (GATA3), Th17- (RORγT) and Treg- (FoxP3) specific transcription factors. Data are presented as median. n = 8 animals per group. *p < 0.05.
