Sustainability Science

Correction for “Climate drives coupled regime shifts across subtropical estuarine ecosystems,” by Stephen G. Hesterberg, Kendal Jackson, and Susan S. Bell, which published August 8, 2022; 10.1073/pnas.2121654119 (Proc. Natl. Acad. Sci. U.S.A. 119, e2121654119).

The authors note that in Eqs. 1 and 2 in the Materials and Methods section, due to typographical errors, the n values “5” and “32” above the summation lines should instead appear as “9” and “36”, respectively. The corresponding methods section text is already written correctly, indicating “To calculate REI, oyster reef centroids were used to measure the direct fetch distance to the nearest shoreline along an array of 36 lines separated by 10° increments.” No data, results, or conclusions were altered by the typographical errors.
