### Supplementary Table 1. Incidence of morbidity endpoints

| Event                                      | Count (Percentage) |
|--------------------------------------------|--------------------|
| Composite of morbidity (n)                 | 303 (28.3)         |
| 30-day or in-hospital mortality (n)        | 19 (1.8)           |
| Post-operative MI (n)                      | 4 (0.4)            |
| Prolonged mechanical ventilation >24 hours (n) | 81 (7.6)        |
| Post-operative CVA (n)                     | 23 (2.1)           |
| AKI (n)                                    | 233 (21.8)         |

Data are presented as the number of patients (%). MI: myocardial infarction, CVA: cerebrovascular accident, AKI: acute kidney injury.
