Supplemental Figure S1. Relative pharyngeal pumping rates of wild-type C. elegans cultured on bacteria expressing the indicated RNAi clones of the aat genes. All feeding data are normalized and presented as the percentage of the *ad libitum*-fed wild-type rates. n= 10-16 animals per condition. ****p<0.0001, ***p<0.001 by ANOVA (Dunnett) in comparison with wild-type animals cultured of RNAi control vector.
