**Editeur**
BioMed Central

**Type**
Article scientifique dans une revue à comité de lecture

**Année**
2009

**Langue**
Anglais

**Date**
2009/07/10

**Numéro**
4

**Volume**
13

**Titre de la revue**
Critical Care

**ISSN**
1364-8535

**Résumé en anglais**
Infusing arginine vasopressin (AVP) in vasodilatory shock usually decreases cardiac output and thus systemic oxygen transport. It is still a matter of debate whether this vasoconstriction impedes visceral organ blood flow and thereby causes organ dysfunction and injury. Therefore, we tested the hypothesis whether low-dose AVP is safe with respect to liver, kidney, and heart function and organ injury during resuscitated septic shock.
