Materials Design Analysis Reporting (MDAR) Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: doi:10.31222/osf.io/9sm4x.). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.
# Materials

## Antibodies

| Yes (indicate where provided: section/paragraph) | n/a |
|------------------------------------------------|-----|
| For commercial reagents, provide supplier name, catalogue number and RRID, if available. | No antibodies were used in this study. |

## Cell materials

| Yes (indicate where provided: section/paragraph) | n/a |
|------------------------------------------------|-----|
| Cell lines: Provide species information, strain. Provide accession number in repository OR supplier name, catalog number, clone number, OR RRID. | No cell experiments in this study. |
| Primary cultures: Provide species, strain, sex of origin, genetic modification status. | n/a |

## Experimental animals

| Yes (indicate where provided: section/paragraph) | n/a |
|------------------------------------------------|-----|
| Laboratory animals: Provide species, strain, sex, age, genetic modification status. Provide accession number in repository OR supplier name, catalog number, clone number, OR RRID. | No animal experiments in this study. |
| Animal observed in or captured from the field: Provide species, sex and age where possible. | n/a |
| Model organisms: Provide Accession number in repository (where relevant) OR RRID. | n/a |

## Plants and microbes

| Yes (indicate where provided: section/paragraph) | n/a |
|------------------------------------------------|-----|
| Plants: provide species and strain, unique accession number if available, and source (including location for collected wild specimens). | No plants were used in this study. |
| Microbes: provide species and strain, unique accession number if available, and source. | No microbes were used in this study. |

## Human research participants

| Yes (indicate where provided: section/paragraph) | n/a |
|------------------------------------------------|-----|
| Identify authority granting ethics approval (IRB or equivalent committee(s)), provide reference number for approval. | Method/Paragraph 1 |
| Provide statement confirming informed consent obtained from study participants. | Method/Paragraph 1 |
| Report on age and sex for all study participants. | Table S1 |
### Design

#### Study protocol

| Yes (indicate where provided: section/paragraph) | n/a |
|------------------------------------------------|----|
| For clinical trials, provide the trial registration number **OR** cite DOI in manuscript. | This study does not involve clinical trials. |

#### Laboratory protocol

| Yes (indicate where provided: section/paragraph) | n/a |
|------------------------------------------------|----|
| Provide DOI or other citation details if detailed step-by-step protocols are available. | No laboratory protocols were used in this study. |

#### Experimental study design (statistics details)

| Yes (indicate where provided: section/paragraph) | n/a |
|------------------------------------------------|----|
| State whether and how the following have been done, **or** if they were not carried out. | |
| Sample size determination | n/a |
| Randomisation | n/a |
| Blinding | n/a |
| Inclusion/exclusion criteria | n/a |

#### Sample definition and in-laboratory replication

| Yes (indicate where provided: section/paragraph) | n/a |
|------------------------------------------------|----|
| State number of times the experiment was replicated in laboratory | No wet lab experiments were conducted. |
| Define whether data describe technical or biological replicates | n/a |

#### Ethics

| Yes (indicate where provided: section/paragraph) | n/a |
|------------------------------------------------|----|
| Studies involving human participants: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval. | Method/Paragraph 1 |
| Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval. | No animal experiments in this study. |
| Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why. | No specimen and field samples are involved in this study. |

#### Dual Use Research of Concern (DURC)

| Yes (indicate where provided: section/paragraph) | n/a |
|------------------------------------------------|----|
| If study is subject to dual use research of concern, state the authority granting approval and reference number for the regulatory approval | This research does not involve dual use research. |
## Analysis

### Attrition
State if sample or data point from the analysis is excluded, and whether the criteria for exclusion were determined and specified in advance.

| Requirement | Provided | Notes |
|-------------|----------|-------|
| Yes (indicate where provided: section/paragraph) | n/a | |

### Statistics
Describe statistical tests used and justify choice of tests.

| Requirement | Provided | Notes |
|-------------|----------|-------|
| Yes (indicate where provided: section/paragraph) | Method/Paragraph 6 | |

### Data Availability
State whether newly created datasets are available, including protocols for access or restriction on access.

| Requirement | Provided | Notes |
|-------------|----------|-------|
| Yes (indicate where provided: section/paragraph) | Data availability form has been filled | |
| If data are publicly available, provide accession number in repository or DOI or URL. | Data will be available upon request | n/a |
| If publicly available data are reused, provide accession number in repository or DOI or URL, where possible. | http://david.abcc.ncifcrf.gov/ http://genome.ucsc.edu/ | |

### Code Availability
For all newly generated code and software essential for replicating the main findings of the study:

| Requirement | Provided | Notes |
|-------------|----------|-------|
| Yes (indicate where provided: section/paragraph) | n/a | |
| Method/Paragraph 3&5 | | |
| If code is publicly available, provide accession number in repository, or DOI or URL. | n/a | |

## Reporting

### Adherence to community standards
MDAR framework recommends adoption of discipline-specific guidelines, established and endorsed through community initiatives. Journals have their own policy about requiring specific guidelines and recommendations to complement MDAR.

| Requirement | Provided | Notes |
|-------------|----------|-------|
| Yes (indicate where provided: section/paragraph) | n/a | |
| ICMJE guidelines were followed, as the journal follows ICMJE recommendations for publication. | | |

State if relevant guidelines (eg., ICMJE, MIBBI, ARRIVE) have been followed, and whether a checklist (eg., CONSORT, PRISMA, ARRIVE) is provided with the manuscript.

| Requirement | Provided | Notes |
|-------------|----------|-------|
| ICMJE guidelines were followed, as the journal follows ICMJE recommendations for publication. | | |
