**Fig. S1** | QL suppresses TNF-α and IL-1β in the circulatory system. (A, B) Enzyme-linked immunosorbent assay respectively for detecting TNF-α and IL-1β expression in serum. TNF-α: tumor necrosis factor-α; IL-1β: interleukin 1β. Data are mean ± standard deviation (\(\bar{x} \pm s\)) (n = 6 or 7 per group); **P < 0.01, ***P < 0.001, ****P < 0.0001.
