Origin single-stranded DNA releases Sld3 protein from the Mcm2–7 complex, allowing the GINS tetramer to bind the Mcm2–7 complex.

Irina Bruck and Daniel L. Kaplan

The panels in Fig. 1B depicting binding of GST-Sld3 to ssARS1-4 and to ssARS1-6 were inadvertently duplicated. As the original data were no longer available, these experiments were repeated. The repeated experiments are shown. This correction does not affect the results or conclusions of this work.
