Table 2: Presence of junctional activity in benign melanocytic lesions.

| Type of lesion and presence of JA | N  | Age [yrs] | Age range [yrs] |
|-----------------------------------|----|-----------|-----------------|
| Pigmented lesions                 |    |           |                 |
| w/ JA                             | 25 | 38.5      | 11-70           |
| w/o JA                            | 17 | 22.6      | 11-57           |
| Amelanotic lesions                |    |           |                 |
| w/ JA                             | 8  | 40.3      | 26-70           |
| w/o JA                            | 10 | 55.2      | 14-81           |
|                                   | 2  | 29.5      | 14-45           |
|                                   | 8  | 61.6.     | 31-81           |

Legend: JA=junctional activity; w/=with; w/o=without; yrs=years
