INTRODUCTION

Education is a process of internalizing culture into a person and society to make people and society civilized. Education is a conscious and planned effort to create a learning atmosphere and learning process so that students actively develop their potential to have religious-spiritual strength, self-control, personality, intelligence, morals and skills needed by themselves, society, nation and state, as well as helping children students in preparing essential needs to deal with change.

It is stated in Article I of Law Number 20 of 2003 concerning the National Education System that the purpose of National Education is to develop the potential of students to have intelligence, personality and noble character. The above objectives illustrate that education does not only form intelligent people but also has a strong personality or character and has a noble character who breathes the noble values of the nation and religion. Character is an important aspect for improving the quality of community resources because the quality of the nation's character determines the progress of a nation.
This is quite relevant when juxtaposed with the Minister of Education and Culture Regulation number 20 of 2018 which contains Strengthening Character Education in which there are eighteen character values which include religion, honest, tolerance, discipline, hard work, creativity, independence, democratic, curiosity, national spirit, love for the homeland, respect for achievement, communicative, love peace, love to read, care for the environment, care for social, and responsibility.

In the life of Indonesian society today, there is a character crisis. The character crisis that afflicts the young generation of Indonesia indirectly affects their personality and daily behaviour. Education is a medium of improvement as well as the formation of the character of the Indonesian people because education is still an effective means to educate the nation's life, both in terms of knowledge and mental attitude. The application of character education in Indonesia should not only focus on the formation of attitudes or behaviour but must also strengthen religious values based on spirituality and Sufism.

Sufism-based education is an effort to develop, encourage and invite people to return to human nature who obey God. Human nature to obey God can be through a vertical amaliah approach to God such as obedience in worship or horizontally establishing relationships with fellow humans and God's creatures. To get closer to Allah can be through educational institutions engaged in Sufism. One of the institutions that use the Sufism approach in its teaching and learning activities is the Jagad 'Alimussirry Islamic Boarding School.

The Jagad 'Alimussirry Islamic Boarding School is a boarding school in the form of a combination of the salaf and modern Islamic boarding schools based on Nahdliyin with the majority of students coming from among the students. This Islamic boarding school implements non-formal education for undergraduate and postgraduate programs in Islamic studies with a Sufism approach. The reason that underlies the establishment of an educational institution in the form of Jagad 'Alimussirry Islamic Boarding School which combines general education, Sufism and character is that it is expected to be a forum for educating, fostering, maintaining and improving the faith and good morals of the younger generation.

Based on the importance of character education as stated in the Regulation of the Minister of Education and Culture regarding strengthening character education for the Indonesian people as well as the importance of spirituality and Sufism as a medium for forming the character of society faced with the problems faced now, the purpose of writing this research is to determine the application of Sufism-based character education, how to implement education. with the Sufism approach and the importance of Sufism education in shaping the character of students at Jagad Alimussirry Islamic Boarding School.(

C. The Importance of Sufism Education in Character Building

Sufism-based character education in Indonesia Jagad ‘Alimussirry Islamic Boarding School has an important meaning in educating students to become Muslim scholars who are lovers/guardians of Allah. One of them is educating humans who have good relationships with fellow humans and God. Character education with a Sufism approach is important because it aims to shape a human character that is oriented towards the world and the hereafter. This orientation teaches about good relationships with fellow human beings and God with good and appropriate attitudes and characters. Through tirakatan and behaviour that is in Jagad ‘Alimussirry Islamic Boarding School is expected to be a way for students who take the path of Sufism to be closer to Allah. During the path of Sufism with the aforementioned characters, there are supporting and inhibiting factors. The formation of character is influenced by two internal factors and external factors outside of him. Internal factors that come from within him such as sincerity and thoroughness will affect the formation of character. If you follow tirakatan, you only follow along and don't explore it, you will not be able to form character. External factors come from outside, can be influenced by the teacher, the circle of friends, and the habits that exist in the cottage.

To overcome the inhibiting factors, the solution is to be aware. Realizing that he wants to change for the better somehow. When you have realized then two things need to be done, namely asking God and introspection. Asking Allah to show the right thing and be given the power to carry it out and show the wrong thing and be given the power to stay away from it. For introspection, it is necessary to reflect and correct oneself about what has been done and done during his life.

CONCLUSION

Based on the results of research on the implementation of character education with a Sufism approach, a case study of the Jagad ‘Alimussirry Islamic Boarding School can be concluded, including:
1. Character education with a Sufism approach has been carried out by the regulation of the Minister of Education and Culture of the Republic of Indonesia Number 20 of 2018 concerning strengthening character education and curriculum in Indonesia.

2. The implementation of character education in Minister of Education and Culture Regulation Number 20 of 2018 concerning strengthening character education is adjusted to the tirakatan curriculum and behaviour in Jagad Alimussirry Islamic Boarding School such as wirid and riyadhoh behaviour. All forms of wiridan and riyadhoh contain their character and need to be contemplated by each student who carries out the practice of tirakat.

3. Sufism-based character education in Indonesia Jagad 'Alimussirry Islamic Boarding School has an important meaning in educating students to become Muslim scholars who are lovers/guardians of Allah. Characters are expected to be contextualized in life in society. There are supporting and inhibiting factors in forming Sufism-based characters, namely internal ones that come from students and external ones that come from outside. The solution in overcoming the inhibiting factors both internal and external is to be aware of yourself and not to lie to yourself.
