Supplementary Table 1. Location and frequency of EBER2 SNPs.

| Name | Minimum | Maximum | Change | Polymorphism Type       | Variant Frequency |
|------|---------|---------|--------|-------------------------|-------------------|
| G    | 44      | 44      | T -> G | SNP (transversion)      | 31.70%            |
| T    | 46      | 46      | A -> T | SNP (transversion)      | 31.70%            |
| G    | 57      | 57      | A -> G | SNP (transition)        | 31.70%            |
| T    | 61      | 61      | A -> T | SNP (transversion)      | 31.70%            |
| C    | 93      | 93      | A -> C | SNP (transversion)      | 31.80%            |
| G    | 168     | 168     | A -> G | SNP (transition)        | 75.40%            |
| G    | 170     | 169     | +G     | Insertion               | 14.60%            |
