The image contains bar charts and tables comparing various health metrics across different age groups and time periods in Iraq.

- **YLLs (Years Lost to Disability)**: The charts show the number of years lost due to disability in 1990 and 2019 for different age groups.
- **Deaths**: Similar charts for deaths, comparing 1990 and 2019 across age groups.
- **YLDs (Years Lived with Disability)**: Charts for years lived with disability.
- **DALYs (Disability-Adjusted Life Years)**: Charts for disability-adjusted life years.

The data is presented in a tabular format with columns for age group, sex, metric, and values for 1990 and 2019.

- **Attributed Rate (per 100,000)**: The rates are attributed to different age groups and are presented for both sexes (male, female, both).

The charts visually represent the trends and comparisons, highlighting the changes in health metrics over time.
