Table S5. Marginal Means of Cognitive Coping Appraisals of COVID-19 stressors by T1 Coping Class and Effect Sizes of Comparisons between Classes

| Outcome   | Relaxed Copers | Approach-Copers | Dual Copers | Approach vs Relaxed | Avoidant vs Relaxed | Avoidant vs Approach |
|-----------|----------------|-----------------|-------------|---------------------|---------------------|----------------------|
|           | M              | 95% CI          | M           | 95% CI              | d                   | 95% CI               | d                     | 95% CI               | d                     | 95% CI               |
| Threat    | 2.63           | 2.46, 2.80      | 2.51        | 2.35, 2.67          | -0.13               | -0.38, 0.12          | -0.04                 | -0.43, 0.35          | 0.09                 | -0.30, 0.47          |
| Harm      | 2.67           | 2.49, 2.86      | 2.84        | 2.66, 3.01          | 0.17                | -0.08, 0.42          | 0.12                  | -0.27, 0.51          | -0.05                | -0.43, 0.33          |
| Challenge | 3.04           | 2.88, 3.20      | 3.12        | 2.97, 3.27          | 0.09                | -0.16, 0.35          | 0.03                  | -0.35, 0.42          | -0.06                | -0.44, 0.32          |
| Alter     | 2.46           | 2.25, 2.68      | 2.74        | 2.54, 2.93          | 0.25                | -0.01, 0.50          | 0.31                  | -0.08, 0.70          | 0.08                 | -0.30, 0.46          |
| Accept    | 4.17           | 4.00, 4.34      | 4.28        | 4.13, 4.44          | 0.12                | -0.13, 0.37          | -0.23                 | -0.61, 0.16          | -0.34                | -0.72, 0.04          |
| Info      | 2.92           | 2.73, 3.11      | 3.04        | 2.86, 3.21          | 0.12                | -0.13, 0.37          | 0.14                  | -0.25, 0.52          | 0.02                 | -0.36, 0.40          |
| Refrain   | 3.22           | 3.01, 3.43      | 3.18        | 2.98, 3.38          | -0.04               | -0.29, 0.22          | 0.09                  | -0.30, 0.48          | 0.12                 | -0.26, 0.50          |

*Note. CI = confidence interval. d = standardised difference between coping groups. Estimates are pooled values from 20 imputed datasets.*
