Impacts of Visual Merchandising on Customer Buying Behavior in Bangladeshi Clothing Stores

Hitoishi Khisa, Md. Enamul Hoque, Md. Faisal Hanif, Mehedi Hasan Chaion, Mahbubur Rahman, Md. Jamir Uddin, Sumaiya Siddika, Tarikul Islam

Abstract — Apparel stores always have to develop their system to survive in the market. Attracting new customers and satisfying the running customers are the necessity for continuing the business. In this regard, retailers design new techniques and gradually reshape it for adopting a competitive market. Visual merchandising is one of the philosophies where retailers are not only presenting their products but also attracting new customers outside the windows. There are a lot of elements in visual merchandising, but its significance varies from region to region. In this study, we considered the local apparel stores for finding the visual merchandising elements and also analyzing which elements are satisfied more for buying a new product in Chittagong. The result of the study showed what are the noteworthy key attributes of visual merchandising affecting consumers buying behavior in that region.

Index Terms — Apparels, Buying behavior, Consumer, Retails, Stores, Visual Merchandising.

I. INTRODUCTION

In 2020, the GDP growth rate of Bangladesh is 8%, which is higher compared to other neighboring countries, including India [1]. The rapid growth of the economy has created new opportunities for retail business for both local and foreign fashion brands in the Bangladeshi market [2]. Indeed, apparel stores are facing more competition for globalization. Nevertheless, high service quality ensures high customer satisfaction attaining the differentiation with other clothing stores [3]. Over the years, apparel stores have reformed their techniques to survive the market places [4].

So far, fit is a necessary attribute for selecting apparel. The term ‘fit’ alludes to the ability to provide enough room to move the human body without difficulty. Likewise, how easily the retailers have engaged with the customers emotionally, psychologically, and behaviorally [5]. Retailers accept that consumers appreciate the store layout and merchandise presentation [6], [7]. As well as, researchers have already demonstrated that visual marketing affects the consumer's mind and influences the other senses, including scent, hearing, sight, touches that push the customers in impulse buying behavior [8], [9].

In the nineteenth century, American museums and department stores displayed their products. Today, displays of products in museums refer to as exhibitions the product displays in stores is visual merchandising [10]. The concept of visual merchandising refers to the communications to customers through windows display, mannequin, floor merchandising as well as assortment, etc., ultimately leading the buyers to purchase that of the products [11]. In a word, visual merchandising is both the presentation of a store and the promotion of the store goods for the ultimate purpose of increasing sales by the teamwork of the store’s advertising, display, special events, fashion coordination, and merchandising departments [12], [13]. Store exterior and interior are the two terms in visual merchandising. The attractiveness of the store exterior e.g. window display, façade, and retail premises instigate customers to choose that store where good store interior e.g. orienting factors, layout, signage, featuring motivates customers for purchasing new cloth by eliminating psychological stress [14].

In a study, it is shown that visual marketing encourages the customer to spend more time in a store. It is also reported that two dimensions of visual merchandising e.g. floor merchandising and shop brand name are related to consumer impulse buying in a positive manner [15]. Thus, they endeavor to keep more focus in case of visual merchandising [16]. Therefore, it is clear retailers have to realize their customers and have to emphasize visual merchandising with perfect harmony according to their desires for stimulating the positive moods of the buyers [17], [18]. Zebal and Jackson established the three main cues product authenticity, consumer cosmopolitanism and ethnocentrism, shaping the Bangladeshi local apparel store [19]. Islam et al. explored the relation of Service quality, customer satisfaction and customer loyalty with apparel fashion retail in Bangladesh [3]. Baten et al. discussed the preference of consumers in terms of Local and Global fashion brands [20].

For identifying visual merchandising and its effect on customers, some international brands Aarong, Sholpik, and Yellow are selected in Chittagong. This study investigated the dominant factors of visual merchandising influencing customers’ buying behavior and in-store promotion activities.

II. EXPERIMENTAL
A. Sources of Visual Merchandising
- Stores (Aarong outlet, Sholpik, Yellow).
- Questionnaire for Customer.
- Primary data and Secondary data.

B. Steps of Methodology
- Step-1: Visit and select clothing in retail stores.
- Step-2: Identify and visual merchandising elements or techniques.
  - Randomly pick 20 customers at each store.
  - Carryout structured interview with visual merchandising.
- Step-3: Fill the questionnaire with the customer.
- Step-4: Get general information from customers.
- Step-5: Identify visual merchandising techniques used in international popular branded stores.
- Step-6: Identify improvements that need to be done to attract more customers.

C. Elements of Visual Merchandising
- Exterior Sign
  The Exteriors sign is nothing but a sign of the stores that ensures the details about identity, locations and information about the stores.
  - Window display
    Windows display indicates a large window in the front façade of the stores manipulating the customers who are not fixing their product and the store [21, 22].
  - Lighting
    Lighting plays an important role in the customers buying behavior that may be influenced by the color temperature, intensity, making the environment more emotional and looking at the product more attractive as well.
  - Interior Signs
    Interior signs deliver more clearly and catchy information as well as it builds awareness among customers about brands for future trade [23].
  - Focal Point
    In A focal point, all the essential and attractive items are displayed as the customers can easily find out their favorite items as well as catch an overall information about total items of the store.
  - Cleanliness
    Cleanliness and well organized decorations are always being appreciated creating a fresh environment for customers.
  - Music
    In terms of buying more products, music is also an impact factor, even though people are not conscious of its volume and choice. In general, fast music is liable to buy less product and, down tempo music psychologically stimulates customers to stay more time and to see more items of those stores [24].

- Space and Layout
  Space layout is a design that provides the position of the equipment or materials. A retailer always tries to utilize the full space of the floor. The objective of the space layout is to ensure the use of the most area of the floor and to create a customer-friendly environment to find out the customer’s desirable product.

D. Questionnaire for Customer
The following data sheet was used to collect the survey data to complete the project work on the basis of seven questionnaires.

| TABLE 1: QUESTIONNAIRE FOR CUSTOMER |
|-------------------------------------|
| Questions | Strongly Agree | Agree | Disagree |
| Exterior Design | 1. The display of signs in front of the store would provide information about the product items and it attracts you into the store. | 2. The arrangement of the windows display would positively affect your impression about the store. |
| Interior Design | 1. Products items placed according to different color combinations take your attention immediately and allow you to find items more easily. | 2. The special lighting decoration inside the store would make a positive impact in your mind and tend to buy more items. | 3. The display of signs inside the store would provide information about the product items and it attracts you into the store. |
| | 4. The focal point inside the store would provide information about the product items. | 5. The cleanliness of the store would make a positive impact in your mind and tend to buy more items. | 6. The use of music in the store tends to let you spend more time and make choices freely. |
| | 7. The space layout plan of the store would make it easier to find out and buy more items. | |

III. RESULTS AND DISCUSSION
A. Total Responses
Responses given to the questionnaire by the customers from all the three outlets is given in the table below:

| TABLE 2: TOTAL RESPONSES OF THE SAMPLE OF 60 CUSTOMERS FROM ALL THE THREE OUTLETS |
|-------------------------------------|
| Techniques | Strongly Agree | Agree | Disagree |
| Exterior Signs | 35 | 25 | 0 |
| Window display | 15 | 45 | 0 |
| Colors | 25 | 35 | 0 |
| Lighting | 35 | 25 | 0 |
| Interior Signs | 45 | 15 | 0 |
| Focal Point | 25 | 35 | 0 |
| Cleanliness | 55 | 15 | 0 |
| Music | 35 | 25 | 0 |
| Space & Layout | 45 | 15 | 0 |
B. Exploration of the Customers’ Responses

i. Study of total responses

Fig. 1 explored the responses between customers. It is presented that 57% customers selected strongly agree where 43% were agreed with those questions.

![Fig. 1. Study of total responses.](image)

ii. The statistics of responses with respect to gender

According to figure 2, 72% females and 28% males responded to this study and filled up the sheet for analyzing data.

![Fig. 2. The statistics of responses with respect to gender.](image)

C. Analysis of Total Individual Responses

From Fig. 3, it is observed that interior signs and the space layout are major attention for customers. 16% of the customers strongly agree with interior signs as well as space layout to find their desired product with no trouble [25]. 12% of the customers strongly agreed with exterior signs, lighting, and music due to the mental satisfaction of their subconscious mind [26]. Consumers regarded less about windows display but focal point, cleanliness, and color on average.

![Fig. 3. Analysis of total individual responses.](image)

D. Discussion

From this survey, it is found that women exhibited more responses during the survey. In considering the attributes of visual merchandising, every element was suitable for visual merchandising. In that survey, 57% voted for strongly agreed and others chose the agreed response. In Chittagong, interior signs and space layout are mostly attracting the customers. Interiors sign gives exact information without communicating, whereas a proper space layout gives to find their desired product area without a struggle. Additionally, other attributes add a new degree for impulse buying such as music, focal point, light system, clean environment because impulse buying is interconnected on also mental satisfaction.

IV. CONCLUSION

Product demand and its sale are dependent on consumer’s behavior toward that product. A customer may like that product or dislike that product. At the same time, they are eager to buy it or not. Essentially, consumer’s behavior is also stimulated by some vital issues, including product quality, taste, environment, manners of the retailers, and their responsibilities. To continue a profitable business, market strategies have to pattern in such a way that consumers are willing to purchase a new one by ensuring their wants and needs. Along with product quality, visual merchandising is also keeping an important role. Yet, it is also true that all the elements are not the same significance in any problem. By analyzing data of the customers of the three well-known retailer brands Aarong, Yellow, and Sholpik, it evaluated interior signs, and the space layout are vital customers’ considerations in the Chittagong region. Overall, the study will help to redesign the retailer shop to fill the desire of the customers and for further studies in Chittagong.

FUNDING

Authors did not receive any fund or grants to conduct the project work.

ACKNOWLEDGMENT

Authors would like to thank Aarong, Yellow, and Sholpik retailers brand stores for facilitating the data precisely from their consumers.
