Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.
Correction

Inhaled ACE2-engineered microfluidic microsphere for intratracheal neutralization of COVID-19 and calming of the cytokine storm

Zhen Wang, Lei Xiang, Feng Lin, Zhengwei Cai, Huitong Ruan, Juan Wang, Jing Liang, Fei Wang, Min Lu, and Wenguo Cui*

(Matter 5, 336–362; January 5, 2022)

In the originally published version of this article, two inset panels of Figure 1B had incorrect placement. The middle column Dapi images for HEK293 (top row) and HEK293-ACE2 (bottom row) were swapped with one another. Of note, only the image was incorrect; the values and description in the figure caption were accurate for all cases. Figure 1B has now been corrected online with the correct image. The authors apologize for any confusion this error may have caused.

Figure 1B. Preparation and characterization of iAE-PMS (corrected)
