Introduction

Onnetsu Therapy uses the vibrations of Energies from the Universe and from the depth of our Planet Earth. Therefore it is not accomplished by people who does not understand, or cannot feel this positive energy of Nature. The person has to be able to tap into this universal energy. Dr. Kazuko’s Onnetsuki is NOT mechanical tool. The Universe has to help the person who has kindness, and do every day meditation to achieve unselfish mind of compassion. Onnetsu means in Japanese “comfortable heat”. The handheld Onnetsuki invented by Dr. Kazuko Tatsumura [1] emits from a special ceramic emitter; 1) Precise 8-10 micron of vibration of the Sun 2) Terahertz frequency. 3) Ceramic Heat up to 70 °C. Dr. Kazuko’s Onnetsuki Patent is pending.

The Onnetsu Therapy incorporates and, is based on four historical and scientific facts.

a. Universal Vibration: NASA’s finding regarding Far-Infrared vibration from Sun light, which is considered as Healing Energy. Dr. Kazuko’s Onnetsuki uses only the most effective area of Vibration. Together with this Far-Infrared vibration, Terahertz is added to make this penetration of the healing vibration fast and deep to reach unhealthy cells.

b. Traditional Japanese Concept of the significance of Inner Body Temperature to be 36.5 °C - 37 °C (97.7 °F - 98.6 °F).

c. Theory of Immunology by Dr. Toru Abo, balancing autonomic nervous system to improve condition of white cells; Proportion of Sympathetic Nerves and Parasympathetic Nerves in White cells which improve Immunity to become 60x35%.

d. Promoting four flows of Energy through acupuncture technique.

Benefit of far infra-red radiation (NASA) with terahertz

Both wavelengths vibrate in similar areas (Figure 1 & 2).

![Figure 1: Far infra-red sun ray(1000-0.75).](image-url)
Unhealthy, degenerated cells and tissues are cold in body temperature and lack in energy. Theory and Therapy: When Onnetsuki is slide over the skin, healthy areas are usually comfortable for patient, but when it is slide over where deep tissue is cold, unhealthy or degenerated, Temperature Sensation reported by the patient is as unusually “Hot”. This ‘hot sensation’ (we call this “Hot Spot”) is created by the existing cold cells or tissues ‘not healthy cells’ with Colder Temperature. Therefore Dr. Kazuko’s Onnetsuki is both a diagnostic and a therapeutic tool (Figure 3 & 4).

When this hot spot is effectively treated with Far-Infrared Onnetsu therapy, eventually the hot sensation subsides and the clinical conditions improves. These abnormal “hot spot” coincides with usual medical MRI examination, and, of with BDORT (Dr. Omura www.BDORT.org) as negative spots. Even very early stage of Cancer can be detected by the Onnetsuki, with this reaction of patients.

**Dr. Toru Abos’ finding in connection of ans activity and white blood cells (WBC)**

a. In a healthy Individual the correct percentages of WBC should be: Granulocyte: 60% Lymphocytes: 35% Macrophages: 5%.

b. Any significant change in these percentages will lead to disease.

c. Granulocytes increase when the Sympathetic Nervous System is dominant (SND). An excessive Granulocyte count will lead to diseases that damage tissues of the body. Autoimmune disorders may result in diseases such as cancer.

d. Lymphocytes increase when the Parasympathetic Nervous System is dominant (PND). An excessive Lymphocyte count will lead to diseases such as allergic diseases and a hyper-active immunity.

e. Too much stress leads to one situation (SND). Too much relaxation leads to another situation (PND).

f. ANS Imbalance may be due to dietary and lifestyle factors.

g. But even the above ideal ratio exists, if body temperature is low, it can not necessarily maintain healthy immune system.
Progress of ‘lady a’s recovery from stage 4 brain cancer: As Observed by Monitoring Her Blood Tests just before starting, and after 2 and 4 weeks of Onnetsu Therapy, during which time the Sympathetic and Parasympathetic Functions of the Autonomic Nervous System were more closely balanced (Table 1).

Table 1: Progress of ‘lady a’s recovery from stage 4 brain cancer.

| White Blood Cell Differential | Healthy Person | Lady ‘A’ 30-Aug-04 (at start) | Lady ‘A’ 14-Sep-04 After 2 weeks | Lady ‘A’ 20-Sep-04 After 3 weeks |
|------------------------------|----------------|-------------------------------|----------------------------------|----------------------------------|
| Granulocyte                  | 60%            | 86.40%                        | 67.30%                           | 61.50%                           |
| Lymphocyte                   | 35%            | 7.20%                         | 22.40%                           | 31.20%                           |
| Macrophage                   | 5%             | 6.40%                         | 10.30%                           | 7.30%                            |

Promoting four flows of energy through acupuncture: Technique sliding Onnetsuki on Meridians in right direction, using also Acupuncture points.

Yin and yang theory of opposite factors-onnetsu therapy uses these organs: The Pair Organs-Yin & Yang Organs influences each other:

- Liver (yin) - Gallbladder (yang).
- Heart (yin) - Small Intestine (yang).
- Spleen (yin) - Stomach (yang).
- Lung (yin) - Large Intestine (yang).
- Kidney (yin) - Bladder (yang).

Five element theory in nature. onnetsu therapy utilizes these flow: Ten Major Organs are Paired into Five, and flow through whole body. The energy flows between them in pairs:

Liver/gallbladder → heart/small intestine → spleen/stomach → lung/large intestine → kidney/bladder and goes back to → liver/gallbladder.

Dr. Kazuko has taught Onnetsu Therapy to MDs and health practitioners over the past decade. Some countries especially, Peru, Cuba, Mexico are utilizing and experimenting this therapy in the hospitals and clinics. Clinical Trials have shown improvements on asthma, cancer, diabetes, rheumatoid arthritis, tuberculosis and various pain conditions. Clinical studies from Cuba and Peru will be presented.
