Table of Contents

Volume 6  Number 9  September 2018

Research on Empirical Formula of Displacement Efficiency in Bohai Oilfield
Y. Duan, S. P. Wang, M. N. Wang, J. Y. Li, G. Wang..........................................................27

Study and Application of Horizontal Well Productivity Formula with Continuous Time-Varying Considered
C. Liu, J. T. Zhang, H. J. Wu, B. Zhang, L. Wang.............................................................32

Reliability Evaluation of Renewable Energy Share in Power Systems
Z. A. Haidar, A. M. Al-Shaalan..........................................................................................40

Frequency Control of Power System with Solar and Wind Power Stations by Using Frequency Band Control and Deadband Control of HVDC Interconnection Line
K. Tada, T. Sato, A. Umemura, R. Takahashi, J. Tamura, Y. Matsumura, T. Taguchi, A. Yamada...........48

Network Reliability Analysis as a Tool to Guide Investment Decisions in Distributed Generation
S. T. Ssemakalu, M. Edimu, J. Serugunda, P. Kabanda..........................................................64

Stability Analysis of a Multi Area System with Renewable Energy and Multi-Terminal DC Tie Lines
M. P. Musau.........................................................................................................................85

Network Structure-Based Critical Bus Identification for Power System Considering Line Voltage Stability Margin
O. B. Adewuyi, M. S. S. Danish, A. M. Howlader, T. Senjyu, M. E. Lotfy..................................97

Numerical Model and Performance Validation of a Small-Scale Concentrating Solar Thermal Power Plant in Louisiana
J. R. Raush, K. Ritter, M. Prilliman, M. Hebert, Z. Pan, T. L. Chambers.................................112

Thermodynamic Simulation of CCP in Air-Cooled Heat Pump Unit with HFCs and CO₂ Trans-Critical
F. H. Chen, S. G. Liao, G. C. Gong....................................................................................141

Security and Stability Aspects of Multi Objective Dynamic Economic Dispatch with Renewable Energy and HVDC Transmission Lines
M. P. Musau.........................................................................................................................165
Journal of Power and Energy Engineering (JPEE)

Journal Information

SUBSCRIPTIONS

The Journal of Power and Energy Engineering (Online at Scientific Research Publishing, www.SciRP.org) is published monthly by Scientific Research Publishing, Inc., USA.

Subscription rates:
Print: $39 per issue.
To subscribe, please contact Journals Subscriptions Department, E-mail: sub@scirp.org

SERVICES

http://www.scirp.org/journal/jpee

Journal of Power and Energy Engineering (JPEE) is an international journal dedicated to the latest advancement of power and energy engineering. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of power and energy engineering.

Editor-in-Chief
Prof. Elias K. Stefanakos
University of South Florida, USA

Editorial Board
Dr. Roberto Capata
Prof. Wei-Hsin Chen
Dr. Chun-Hu Cheng
Dr. Smith Elamsa-ard
Prof. D. Yogi Goswami
Prof. Zhongjie Huan
Dr. Freddie Liswaniso Inambao
Prof. Nnenesi A. Kgabi

Prof. Ching-Fuh Lin
Prof. Rodolfo Dulo López
Prof. Elham B. Makram
Prof. George Papadakis
Dr. Elias Papanicolaou
Prof. Raul Rabinoiovici
Prof. M. Ramamoorthy
Dr. Manuel Romero

Dr. Ravi S. Srinivasan
Dr. Vittorio Verda
Prof. Valery Vodovozov
Prof. Nikolai Voropai
Prof. Chao Xu
Dr. Wenzian Yang
Dr. Xiaowei Zhou

Subject Coverage
All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copy. The journal publishes original papers including but not limited to the following fields:

1. Power Generation-Conventional and Renewable
   - Bio-energy technologies, process and utilization
   - Environmentally-friendly technologies for power generation
   - Geothermal and tidal wave energy
   - Hydropower technologies and applications
   - New technologies and design for energy efficiency
   - New technologies for minimizing CO2 generation
   - Other sustainable energy
   - Photovoltaic for solar power applications
   - Safe nuclear energy generation and utilization
   - Thermal power technologies and applications
   - Waste products as fuel
   - Wind power generation and utilization

2. Power System Management
   - Application of wide area measurement systems (WAMS)
   - Control strategies for modern power system stability
   - Integrated substation automation technologies
   - Load modeling, estimation and forecast
   - Modeling and simulation of large power systems
   - Online monitoring and fault diagnosis system
   - Power system analysis and optimization
   - Power system management technologies

3. Power Transmission and Distribution
   - Advanced distribution and SCADA technologies
   - Electromagnetic analysis in power systems
   - Electromagnetic compatibility in power systems
   - Electromagnetic transient in high voltage power systems
   - HVDC and flexible AC transmission systems (FACTS)
   - Insulation condition monitoring in power systems
   - Over-voltage, lightning protection and grounding
   - Plasma physics and the pulsed power technology
   - Ultra High Voltage (UHV) technologies

4. Smart Grid Technologies
   - Agent-based Computational Economics for Grid
   - Agent-based mechanisms for Grid markets
   - Agent-based simulation of Grid environments and markets
   - Automated negotiation for Grid resource allocation
   - Engineering of Grid markets and Grid architectures
   - Modeling of Grid environments
   - Resource allocation in Grid scenarios using agent-based approaches
   - Technical research on future application domains

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

Notes for Intending Authors
The submitted manuscript should not have been previously published in any form and must not be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All paper are refereed through a peer process. For more details about the submissions, please access the website.

Website and E-Mail

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
