Environ Health Perspect 123(6):636–642 (2015), http://dx.doi.org/10.1289/ehp.1408417

In Figure 1A, which represents the association between the difference in BMI z-score at age 7 and maternal serum PBDEs (ng/lipid), the line of the upper confidence interval of ∑4PBDE for girls incorrectly crossed the zero-line: The upper interval for girls is −0.05 and should appear below the zero-line. The corrected Figure 1 appears in this erratum.

The authors regret this error.
