In the original publication, Table 2 was overlooked by the author during proof checking. The correct version of Table 2 is given below:

| Dilution of anti-CV777 S polyclonal antisera | 1600 | 3200 | 6400 | 12800 | 25600 | 51200 | 102400 |
|---------------------------------------------|------|------|------|-------|-------|-------|-------|
| CV777                                       | +++  | +++  | ++   | ++    | +     | +     | -     |
| LNCT2                                       | +++  | +++  | ++   | ++    | +     | -     | -     |
| Vero E6                                     | -    | -    | -    | -     | -     | -     | -     |

| Dilution of anti-LNCT2 S polyclonal antisera | 1600 | 3200 | 6400 | 12800 | 25600 | 51200 | 102400 |
|---------------------------------------------|------|------|------|-------|-------|-------|-------|
| LNCT2                                       | +++  | +++  | ++   | ++    | +     | -     | -     |
| CV777                                       | +++  | +++  | ++   | ++    | +     | -     | -     |
| Vero E6                                     | -    | -    | -    | -     | -     | -     | -     |

The online version of the original article can be found under doi:10.1007/s00705-015-2694-6.

Also, the text in page 7 should read as below:

The average titer of anti-SLNCT2 PAbs neutralizing CV777 reached 1:230, while the titer of neutralizing LNCT2 was 1:387.
