**Supplementary Table 2.** Type of alleged problems in pediatric patients

| Classification                  | Total (n = 18) |
|---------------------------------|----------------|
| Delayed intubation              | 13\(^{a}\) (72.2) |
| Aspiration of gastric contents  | 3 (16.7)       |
| Upper airway trauma             | 1\(^{b}\) (5.6) |
| Accidental bronchial intubation | 2 (11.1)       |

\(^{a}\) There was 1 case involving 2 events: delayed intubation and aspiration of gastric contents.

\(^{b}\) Vocal cord injury (n = 1).
