THE MORTUARY CHAPEL OF UKHHOTEP SON OF IMA (A. NO.3) AT MEIR

Nour GALAL

Associate professor, Faculty of Arts, Ain-Shams University, Egypt
E-mail: noursmn2007@yahoo.com

ABSTRACT

This article investigates the mortuary chapel of Ukhhotep son of Iam (A. No.3.) at Meir. Our information about Middle Egypt comes primarily from the cemeteries of the wealthy princes and mayors who were associated with political and religious centers of its administrative regions, or nomes; especially at Qaw el-Kebir, el-Rifa, Asyut, el-Bersha, Beni Hasan. El-Qusiya is another important site which is located almost 50km north-west of Asyut. It was the cult center of Hathor. It was the capital of the Fourteenth nome of Upper Egypt. Meir was its necropolis. This nome was rich. Its rulers maintained a considerable state of nobility. They were a class of the mayors (nobility krht) which is reflected on their burials. Meir necropolis lies at the edge of cultivation. The tombs were cut into the rock cliffs. These tombs are characterized by the absence of portico on the façade. The chapel of Ukhhotep son of I am (A. No.3) is the focus of this article. It is located up on the cliff of Meir. The chapel has not been studied in details. I aim at providing the full history and description. The date of the chapel could be the time of Senwosret I

ARCHITECTURAL FEATURES

The chapel is clearly visible cut in the second terrace of the eastern face of the cliffs overlooking the western side of the town of el-Qusiya.\(^1\) The quality of this chapel is very bad. It is located above the tomb of Pepyankh A\(^2\) (was also known by the name of Heny-Kem) (Fig.1). The chapel consists of a rectangular room (about 3.2 m. from north to south and 3.70 m. from east to west). It does not have a shaft for a burial. Although the chapel is unfinished, the general view of the first recess which belongs to Ukhotep (pl.1 A), looks like false door\(^3\), and few traces of torus and cavetto cornice are still visible\(^4\). The torus surrounds the panel and the niche. It makes the edges of the monument have a transversal fluted decoration\(^5\). These features were attested mid-Fifth Dynasty as a sign of high status of the owner. They became common in the Sixth Dynasty, although they coexisted along the older type. The main terms for mortuary chapels of private and royal individuals were hwt k\(3\) and st nh\(h\), šf\(t\), m\(h\)t and also r-pr\(5\) which could be used for an offering chapel as for false door by extension, along with the usual term rwr\(7\). According to F. Servajean, it is possible for the deceased to come in and come out his tomb, if a st nh\(h\) "place of time" (funerary chapel) and a tp\(h\)t n dl "cavern of eternity" (burial place) are at his disposal\(^8\) (possibly tp\(h\)t could indicate both, a niche and a room).\(^9\)

In the north wall of the chapel, there are two statue- recesses. The western recess is painted pink with dark reddish spots to imitate red granite. The two recesses designed to keep a statue of the deceased, Ukhotep (Fig.2). Statues generally were placed in the chapel in order to provide permanent residing places for the soul of the deceased, substituting the body if it was destroyed. There is a socket at the top and bottom for the two doors- leaves to turn in. The rest of the interior ceiling, walls, and floor, is roughly hewn. The walls of the chapel were coated with mud plaster, but not apparently the

THE OWNER OF THE CHAPEL AND HIS TITLES

There is no titles assigned to Ukhotep in the chapel (A3) except the most common one hšty-cn. This title perhaps was a local title, simply served to enhance the prestige and denote the status of the dominant local leader, without any further administrative consideration.2 M. Pardey, added that it is an elusive term meaning literally "foremost of position"; he often translate it as "baron", general mayor also could be a rank title.3 There are many cases where the title hšty-cn appears immediately before the name of the official.4 Other epithets mš-cn hrw, vindicated, and lmrhnw, venerated, were attested. They assert that the owner has achieved or is destined to achieve, a place among the honored and transfigured beings in the afterlife.5 Non royal memorials tend to present the highlights of the official's entire career consecration of their tomb or votive chapel. This chapel does include a long autobiographical text,6 while numerous epithets are distributed throughout the tombs of Ukhotep II,7 Ukhotep III and Ukhotep IV.8 Their titles were held by many other high and middle rank officials. No sign that these local governors claimed royal power. W. Grajetzki attributed the presence of the royal

symbols in the decoration of tomb of Ukhhotep IV at Meir\(^1\) and in the tomb of Wahka II at Qaw el-Kebir to the cult of Hathor and her relationship with the kingship in these two cemeteries.\(^2\)

**Inscriptions (pl. 2)**: On the façade the inscriptions are divided into four horizontal lines, reading from right to left. The main text consists of four horizontal lines of incised colorful hieroglyphs on the upper lintel, oriented from right to left. The text on the right and left outer jambs comprises two vertical columns which consist htp di nsw formula.

![Inscriptions on the façade of the western recess (upper lintel)](image)

(1) He made as his monument for his father\(^4\), the Governor Ukhhotep, son of Ima, who has gone to his ka-domain of this tomb-chapel inside {it}

(2) An offering which the King gives, an offering which Osiris gives [lord of ddw, the foremost of the westerners], lord of Abydos, great god, lord of the west\(^5\), he gives: a thousand of bread, beer, oxen.

---

\(^1\)The governor Ukhhotep IV at Meir had a wish that he may become a king. In this context, there is no sign that the local governors assumed royal power. They just followed new religious beliefs; Grajetzki, W., *The Middle Kingdom of Ancient Egypt*, London, (2006), p. 98; Fischer, Gaufrarst, *LÄ II*, 411.

(4) the honored one, the count Ukhhotep, son of Iam, The Justified; as what his beloved, his son has made for him the Governor, Ukhhotep's son, Ukhhotep, Justified.\(^3\)

**COMMENTARY**

The façade consists of four horizontal lines. Line 1, is badly preserved. The text can be studied only with difficulty. I propose some different signs from the Blackman's facsimile (Meir VI, pl. V). Blackman's translation "he made (it) as his monument for his father, the Governor, Iam's son, Ukhhotep, justified...this tomb-chapel is in?" (Meir IV, p.2). Fortunately, it was possible for me to examine the chapel personally, however, allows a slightly revised transcription and translation which cited above.

The opening phrase line in this chapel begins with the emphatic sDm.n. f; it is identical to the tag found on the 'Mayors List' in B4.\(^4\) The signs at the end of line no. 1 are smaller and less deeply incised.

The second line is also badly damaged, including htp-di-nsw offering formula\(^5\), which is repeated twice later. This line may be restored as \([htp \, di \, nsw \, Wsir \, [nb \, ğişw \, \hat{h}nty \, Imntyw] \, nb \, ıntb\]). The line offered sufficient space for this, compare, for example the Osiris epithets in the offering list of private tombs\(^6\), and Beni Hassan.\(^7\)

One thousand \[\text{\(\_\_\_\_\_\_\)h\(3\)-m}\] is required of each food item. The deceased used to record his wish of certain offerings, some of which were traditional while others were more specific to his taste.\(^8\)

8 The word that expressed the desires was \(stpw\) = the best things \(\text{Wb IV 338-339 (14) noun derived from the verb \(stp\) denoting the best things in general.}\)
This chapel was dedicated to the k3 of Ukhhotep to have an everlasting source of food, drink and other vital offerings in the afterlife. The Ennead may perform as a less strict commission of reception in the realm of the dead, so the offering formula was by their names with Osiris and Anubis who associated with the burial ground on higher desert ground (t3 ntr). Inscribed offering formulas would magically sustain the tomb owner's spirit when the mortuary priests and relatives read the text, if they ceased to provide real offerings of food and drink1. Bread was essential item of offering for the deceased individual and the gods alike, presented in daily rite. Wine also was often an important item in funerary cults, besides its general significance as an item of wine took a certain specific religious and mythological associations, in the pyramid texts; Osiris was mentioned as the lord of wine in the Wag Festivals (Pyr 442; & 820a)2. The ka of the deceased had access to all things good and pure on which a god lives. Acts of libation, purification and censing were associated with the rejuvenated deceased3. The forth line repeats the names and title again. It describes Ukhhotep as an honored one imAx (venerated, the one who has been provided for transfigured dead)4. Ukhhotep was the son of Ukhhotep who was the son of Ima. Thus Ima is the grandfather of the last Ukhhotep5. The Egyptian language has no special words for grandfather, grandmother, Grandson, and granddaughter, although references to father's father and similar terms were attested6.

THE INSCRIPTION ON THE LEFT JAMB

(5) htp dī nsw psḏt-5’r’ imyt 3bḏw dī psḏt [5’r’ imyt 3bḏw ḫ3 m …]

5See below.
6Even it /mwt could be used for father/mother in law for more details see: Robins, G., ‘The Relationships specified by Egyptian Kingships Terms of the Middle and New Kingdoms’, CdE 54, (1979), 197-217; Bierbrier, M. L., ‘Terms of Relationship at Deir el-Medina’, JEA 66, (1980), 100-107.
The text starts again with the offering formula of *htp dl nsw* to the great Ennead in Abydos. This Ennead is composed of seven gods: two Khnum-gods, Thoth, Horus, Hor-nedjitef (1), and two Wepwawet-gods, or of twelve gods: Osiris, Hor-nedjitef, Isis, Nephthys, Min, Iunmutef, Re-Harachte, Onuris, Tefnut, Geb, Thoth and Hathor (2). Different kinds of offerings occurred (particularly in the late Twelfth and Thirteenth Dynasties stelae). They are usually more fully written out: *sntr h3 m kbh h3 m mrht* offering of incense *sntr* (make divine) conforms to its use in earlier periods in rituals (3). Incense being the sign of god's presence and a medium for communicating with him. The action verb was *sti* is normally used for scattering solid substances such as incense (4). The libation offering *kbH* is paired with the offering of incense in the funerary offering which is made to the deceased.

**THE INSCRIPTION ON THE RIGHT JAMMB**

(7) *htp dl [nsw] Inpw hrp t3wy tpy dw.f imy wt nb t3-dsr dl.f prt-hrw t hnk t k3w 3pdw ss mnht m (8) 3bd mqdint (ismdt) hryw-rnpt 5 wpt-rnpt Whg msys n h3ty-5 Wh-hlp*

(7) "An offering that the king gives of Anubis, director of the two lands, who is upon his mountain, the embalmer, lord of the necropolis. He gives invocation-offerings: bread, beer, oxen, birds, alabaster-vessels, and garments, (8) the monthly-festival, the half-monthly festival, the five epagomenic days, the new year's day, the Wag-festival, and the supper (of the beginning of the year), for the Governor Ukhhotep".

**COMMENTARY**

In these two lines, the text mentions the offering formula, the dates on which these offerings should be presented, linking them to specific festivals. Food could also be actualized by recite a "voice offering". There were texts on some stelae had instructs visitors if they have nothing in their hand to say a thousand of bread, beer… and every good thing (5). The "prt-hrw", formula does not appear after *dl.f* and before the group of offerings (6). While this group of signs literally means 'sending the voice'. It actually

indicates "presenting offerings".\(^1\)

**This chapel interested in belongs to the sequence htp-dj-nsw formulas**\(^2\)

The presentation of offerings often interpreted as the return of the Eye of Horus to its owner, thus suggesting a well-known episode in the myth of the conflict between Horus and Seth.\(^3\) Osiris, great Ennead and Anubis are asked to provide invocation offerings and permit the deceased to travel through the beautiful roads of \textit{im\textit{h}w}.\(^4\) \textit{htp-dj-nswt dj Wsjr} (line 2): a feature that indicates a date at the end of the Sixth Dynasty or later. The root \textit{htp} means both offering and peace. Offerings were made by private persons such as who are depicted in the tombs. The offerings could be fully effectual, if they were presented in the name of the king. The developments in the Middle Kingdom raised the status of both Osiris and Abydos. The cult of the funerary god became extremely popular during this period.\(^5\)

The term \textit{nfr} \(^3\) “Great God” is usually specified; it could refer to Ra, Osiris, or to the deceased king himself. However, it seems that in most non-royal texts it probably refers to the god Osiris. Osiris is also called Khenty-Imentyu. It is also more common in the first half of the Twelfth Dynasty. However, Khenty-Imentyu is not written with the determinative of a seated god, which was a common writing for this divine name only later. It is not before the mid-Fifth Dynasty that the Osiris legends, which represent well the idea of resurrection and after life, came to be associated with the funerary beliefs of the individual.\(^6\) Peter Der Manuelian published an important false door of the lady Jntj from Giza (Boston, MFA 31.781) with the offering formulæ mentioning Osiris twice. He dated it to late Fourth Dynasty. Then this god began to take his place beside Anubis in the prayers and soon was considered the principal deity of the dead.\(^7\)

**hḥp-dj-nsw psDt (Line 5)**

Ennead (psDt). Originally indicated the nine gods incorporating the physical creation of the world⁵: Atum; Shu and Tefnut; Geb and Nut; Osiris and Isis, Seth and Nephthys, known as the ‘great Ennead’ (psDt ṣt); it is also a term for any number of gods conceived as a group, and for all the gods⁶. The ‘great Ennead’ also represented the gods of Lower Egypt, compared to the ‘Elder Ennead’ (psDt wrt)⁷, also known as the ‘Little Ennead’ (psDt ndst), which consisted of the gods of Upper Egypt. Together, these two Enneads were known as ‘the Dual Enneads’ (psDtj).

**hḥp-dj-nsw Anubis (Line 7)**: It is noted that the formula of offerings was dedicated to Anubis in line (7). Osiris and Anubis are patrons of the western desert and the netherworld associated with funerary offerings.⁵ Anubis was providing burial and sustenance for the deceased, but Osiris could provide eternal life.⁶ The writing of the name of Anubis with the sign of a jackal ḫḥ is characteristic of the period till the beginning of the Sixth Dynasty, the jackal on a shrine ḫḥ was emerged in the reign of the King Teti; however, the old variant was not completely discarded, especially when ḫḥ was placed above horizontal signs, ◦ and ◔.

**Festivals (Line 8)**: The list of feasts is one of the main points of focus in this chapel. The regular offerings were presented during specific festivals and periods.⁸ The mortuary contracts which the local governor ḏḥ(j) ḫḥpy made with the priesthood of Asyut early Twelfth Dynasty focused on specific festivals and on cults which should be performed for his statues in the temple. One of the main groups of contracts refers to the tomb and a statue which may have been there.⁹ The tomb of ḫmn-hḥp II at Beni Hassan provides useful information concerning the day feasts. In the chapel of ḫḥw-ḥtp(A3), the list of feasts on the north wall comprise: ḫbd, ṣmḥt, Epagomenal days, ṭp

¹cf. Offering formula which was under the protection of Osiris and Soker and Ennead of the white wall (Louvre LD 65)
²The term ennead is not as a circle of nine gods, but as a circle of a plurality of gods.
³The Elder Ennead (psDt ṣt) was first of all considered as Heliopolis’s Ennead (cf. §§14c, 770d, 845b, 895b, 1655a, 1660a; CT V, 208b; Blackman, Meir II, pl. 6; Budge, BD151:11 (first version), BD151:8-9 (second version)) or as Atum’s Ennead (cf. CT II, 18f; psDt ṣt sīt ḫlm, 22b: psDt ṣt ḫlm, 52i: psDt ṣt n(t) tm) rather than as the Ennead that represented the gods of Lower Egypt.
⁴The Great Ennead (psDt wrt) was also located in Heliopolis, §1689c: ḫn psDtj wrt ṣt ḫntj(j) ḥbw ḫjmnw "say the Great and Elder Enneads that are at the fore of the base of Heliopolis", and probably was headed by Geb.
⁵They also appeared in Middle kingdom coffins; sometimes tend to replace the two gods with Nephthys and Isis who were represented during the burial rites by priestesses positioned at the corpse’s head and feet.
⁶The connection with embalming ritual and the identification of šḥ ntr of Anubis or ḫbw or ḫḥšt see: Gudschoff, B., ‘Nouvelles données concernant la tente de purification’, ASAE 51 (1951), pp.129-140; Altenmüller, H., ‘Die Bedeutung der Gotteshalle des Anubis’ im Begräbnisritual’, JEOL 7 no.22 (1971-1972), pp.307-317; Lehner, M., Complete Pyramids, p. 27; Oxford, Following Osiris Perspectives on the Osirian Afterlife from Four Millenia p. 556 (online).

⁸Graefe, E., ‘Talfest’, LÄ VI (1986), cols. 187-9; Grajetzki W. & Quirke, S., Festivals in the ancient Egyptian calendar, Digital Egypt for Universities, University College London. Retrieved 31 October, (2015)
⁹Reisner, G., ‘The Tomb of Hepzefa, Nomarch of Siūt’, JEA 5, (1918), pp. 79–98.
Five Epagomenal Days: the Epagomenal days are five days over the year (days 361-365 of the official year, added to the 12 months), they were not part of the normal year created by the gods. Five children were born on these days: Osiris, Horus, Seth, Isis and Nephthys. The Msyt feast was after the Epagomenal days but before w3g, designating the night preceding the first day. It was observed that Anubis offering formulae more attached to msyt which always follows w3g feast.

The $\text{W}\text{3g- festival}$: it was an old festival $\text{msyt, w3g}$ which was celebrated with at the beginning of the inundation on the 17th, 18th and 19th. The latter date, i.e. 19th was also Thoth's festival, according to the great festival list in the temple for Ramesses III at Medinet Habu. Parker has confirmed that this feast, according to Illahun papyri, celebrated on the 18th of the first civil month. Most Middle Kingdom coffins replaced the name of the festival with a clause containing the verb $w3g$. However, the Pyr & 716c had the name of the festival which occurred later on some Middle Kingdom coffins. Moreover, even the adapted readings from the Middle Kingdom must refer to the festival cf. Pyr & 2185a-b: "w3g yourself with bread just like Horus "$w3g$- ed" his Eye in this name of $W3g$- festival", the verb $w3g$ here obviously has some such sense as "to provide" cf. Pyr. &192a; & 1944c; & 2114a; & 2230b; & 2289 b; cf. Stela Louvre (c 35) mentions the $w3g$ festival and alludes to other festivals which Osiris crosses from the great Gat of Haker, cf. also stela CG. 20546, a 4-5; Pyr. & 820a. CT III, 159b; CT III, 158c-159 b.

9Parker also stated that there was a movable feast as well as a fixed $W3g$ feast in the Middle Kingdom, 182.
GENERAL COMMENTS

Egyptians believed that the name should remain for the individual's memory; they built tombs\(^1\), containing the body in the substructure while the superstructure contained the false doors, chapels which usually include statues and offering table\(^2\). The offerings focused on the tomb in the Middle Kingdom. In general, the purpose of the false doors, chapels, and many texts indicate that they were to maintain the needs of the deceased of offerings and keep his memory alive.\(^3\) The chapel whether it was attached to the tomb or not represented a mean for the living to communicate with the dead people\(^4\). Chapel was a place for interaction with those who might present offerings and say prayers where ceremonies are enacted before the statues. The different texts places emphasis on this feature:

\[
\begin{align*}
\dd{tn} \ ni \ t \ hnk.t \ m-ntt \ m-\cdot{tn} & \text{ "so may you give to me bread and bear from what is with you"} \\
\ff{tn} \ m \ f\wi.tn & \text{ "may (you) elevate with your arms"} \\
\wdn.tn \ m \ r\i.tn & \text{ "may you offer with your speech"} \\
\dd{k\i.tn} \ m \ r.tn \ wdnw \ m\f.tn & \text{ "you shall say with your mouth and offer with your hand"} \\
\end{align*}
\]

The Egyptian religion emphasized the importance of the family as a very important unit. For example, the ennead of Heliopolis set forth as a family group and in order of seniority, which goes along with the document Teaching of Duaf's son Khety from the Middle Kingdom, the author tells his son to “thank God for your mother and for your father, who put you on the path of life”. This chapel also shows the affection and respect from a son to his father, which reflects the loyalty and respect to the father in the ancient Egyptian society. Kees, pointed out that these feasts were connected with the desire of the tomb owner to be associated with his family, and priests at specific religious on holidays\(^7\). Males had more reasonable issue in providing the offerings and ensuring the performance of rituals for their dead fathers.\(^5\) This action was closely linked to the Osirian mythical narrative where the divine son, Horus, fulfills the funerary needs and mortuary cult of his murdered father, Osiris. The explanation of Horus and his defense

Franke, D., 'Altägyptische verwandtschafts bezeichnungen im Mittleren Reichs', HÄS 3, (Hamburg 1983).
of his father gave meaning and form to the world beyond the grave\(^1\). The chapel A3 may be served as a place for family gathering in order to address the deceased and keep his memory alive among the living and provide essential provisions for him in the afterlife. From an elite perspective, another benefit from the visitors to these chapels was of course wider than that of temple priests, including women, servants, children, and public in general who ask for help. Any visitor, who can read, could activate the formula, inscribed and embedded within the offering imagery at this chapel\(^2\). Mortuary rites spoken or enacted by a ka-priest, was usually represented by an elder son of the deceased\(^3\).

**GENEALOGY OF UEKHHotEP (A3)**

Difficulties are encountered in determining the absolute genealogy of Ukhhotep (A3) due to the names Ukhhotep along with Snbi, are the most popular and repeated names in Meir. The name of Ukhhotep was well attested in the Middle Kingdom. It was written by many variants e.g.: \(\text{\begin{picture}(25,25)
\put(2,0){\includegraphics[width=0.5\textwidth]{image}}
\end{picture}}\) Wh-\(\text{\begin{picture}(25,25)
\put(2,0){\includegraphics[width=0.5\textwidth]{image}}
\end{picture}}\) \(\text{\begin{picture}(25,25)
\put(2,0){\includegraphics[width=0.5\textwidth]{image}}
\end{picture}}\) Wh-\(\text{\begin{picture}(25,25)
\put(2,0){\includegraphics[width=0.5\textwidth]{image}}
\end{picture}}\). We have many Ukhhotep; Ukhhotep son of Snbi, (tomb B2)\(^5\), Ukhhotep was a son of Ukhhotep (tomb B4)\(^6\), Ukhhotep (tomb C1)\(^7\), in the same site, we have the Tomb of Wh-\(\text{\begin{picture}(25,25)
\put(2,0){\includegraphics[width=0.5\textwidth]{image}}
\end{picture}}\) son of Wh-

---

\(^1\)Quirke, S., *Ancient Egyptian Religion*, London (1992), pp. 52-61, 66; Dr. N. Kanawati told me (personal communication) that the reason why the tomb A3, which is the subject of my article, is positioned in an area that must have been considered as a remarkable example of filial affection. The tomb is above tombs A1 of Ninakhpepy the Black and A2 of his son Pepyankh the Black. In fact Ninakhpepy excavated a huge tomb, A4, but died after preparing its walls for decoration, and before any scenes or inscriptions were executed. His son Pepyankh excavated and decorated a burial chamber for his father in tomb A4, then he cut the two adjoining tombs A1 and A2. The former was for his father and the latter for himself, and connected the burial chamber of tomb A4, where the father is buried to the chapel of A1 by a plopping passage. This would allow the father to communicate between tomb A4 where he is buried and the chapel of A1 in order to receive offerings and to communicate with his son in their communicating chapels A1-A2. This is a large extent similar to the contemporary one of Djau and his father Djau/Shemai of Deir el-Gebrai, who was even buried in the same tomb. The son wrote that he buried his father with him in order to be able to see his father every day and to be with him at the same place. Deir el-Gebrai is very close to Meir and the two cases of father-son affection must have been well known at el-Qusia. Perhaps Ukhhotep’s selection of the site was to demonstrate the type of affection which he had for his father) for the tombs A1 and A4 see: Kanawati, *Meir III*. Another example from Meir reflects a sort of loyalty between father and son. The tomb of Ukhhotep II (B2) is separated from that of Ukhhotep II, s ???(father Senebi 1 B1) only by a thin partition wall; Altenmüller, H. *Family, Ancestor Cult and some Observations on the Chronology of the Late Fifth Dynasty.* in H. Vymazalová and M. Bártá (eds), *Chronology and Archaeology in Ancient Egypt (The Third Millennium B.C.). Proceedings of the Conference Held in Prague (June 11-14, 2007)*, (Prague, 2008). 144-161.

\(^3\)The ritual of opening the mouth perhaps took place in the time of Amenhotep I in the chapel of the tomb, but it may be experienced in this place starting from the middle kingdom Otto, *Mundöffnungsritual II*, p.8.

\(^4\) Ranke translated the name "der Gott wh ist gnädig"; Ranke, *PN I*, 84, 9. 10; II, 35. 36. 45. 69. Other names appeared such as Wh-\(\text{\begin{picture}(25,25)
\put(2,0){\includegraphics[width=0.5\textwidth]{image}}
\end{picture}}\) PN 1, 94,03; Wh-\(\text{\begin{picture}(25,25)
\put(2,0){\includegraphics[width=0.5\textwidth]{image}}
\end{picture}}\) PN 1, 84,6; Mr-Wh-\(\text{\begin{picture}(25,25)
\put(2,0){\includegraphics[width=0.5\textwidth]{image}}
\end{picture}}\) PN I, 156, 4; "name des gottes von Kusae" *Wh I*, 352.

\(^5\)Blackman, *Meir II*, *PM IV*, 250-251

\(^6\)Blackman, *Meir III*, *PM IV*, 251-253.

\(^7\)It is possible that the owner of tomb A4 provides the link between Ukhhotep of C1 and the earlier rulers of this district: Blackman, *Meir VI*, 8-37; *PM IV*, 253; Martin, *E.,LÄ VI*, 821-822. Kanawati disagrees with most scholars in the number of the governors of Meir, as he gives numbers only to those who governed the province and not to anyone who was called Ukhhotep: Ukhhotep I (B2), Ukhhotep II (B4), Ukhhotep III (C1) (personal communication).
The dating of the members of nobility at Meir was discussed from Old Kingdom to the Middle Kingdom. Ukhotep son of Ukhotep (B4) came from a big family. He had at least three brothers who also were called Ukhotep. A very important list of counts hītyw- of this nome is recorded in his tomb, but unfortunately it is partly damaged and no fixed dates are given. It once depicted 59 persons (with their wives) holding the title hīty-. The purpose of their inclusion was clarified as he stated that: "I did this in order that their names endure forever". A name and an epithet, mój hrw, were given to each figure. With regard to the identity of Ukhotep Oof A3 and his relationship to the other officials who bore the same name; the second figure in the fifth register of the counts list mentioned hīty Tmn, suggests to be the father of the hīty Ukhotep A3. Iam must be a hīty- because his son is the son of hīty-. Gillam, in her dissertation on the 14th Upper Egyptian nome, stated that 'in all discussions of individual titularies, titles are assumed in the absence of any definite indications to have been held simultaneously with each other. This is not entirely satisfactory, but the nature of our data leaves us with no choice.'

I regard simply that Ukhotep of A3 as perhaps the ancestor of the family and one of the earliest of the Middle Kingdom, and perhaps he was buried in section A, close to the officials of Old Kingdom and away from those of the Middle Kingdom in section B and C. But unfortunately, genealogy is not much of an aid in determining absolute chronology of the owner of A3. There is no clear connection whereas no document was found in the necropolis that provides an absolute genealogy.

**DATE OF THE CHAPEL**

In general, the chronology of the rulers of the 14th upper Egyptian Nome who were buried at Meir is clearer than the other Middle Kingdom monarchs. This recent article places emphasis on the importance of counting the generations in determining the chronology of the monarchs of el-Qusiya at the end of the First Intermediate Period and the beginning of the Middle Kingdom. Five tombs confirmed with royal dates of Twelfth Dynasty, namely the tomb of Senbi I (B1), Ukhotep (B2), Senbi II (B3), Ukhotep (B2) and Ukhotep (B4) Ukhotep (C1). As for Blackman, he dated the

chapel from Senwosert I to Amenemhat III. Holzl didn't specify a date but placed it generally in the Middle Kingdom. Willems pointed out that the chapel dates to the Old Kingdom but it was not finished (the later hypothesis seems to be not acceptable at present because there are many doubts).

Preliminary analysis of the chapel structure, offering formula, and archaeological contexts dates the chapel to Senwosert I. The paleography of the hieroglyphs seems to point to a date in the Twelfth Dynasty. The offering formula was considered a characteristic aspect for the first part the Twelfth Dynasty by C. Bennett. In the offering formula, the name of Osiris was written by the determinative of a seated god, which is more common in early Middle Kingdom. O. Berlev remarks that the request of "every pure thing/ all pure things" (also in line 2, above) is typical in the Eleventh Dynasty and the reign of Senwosert I, whilst later the most frequent phrase is "all good and pure things", and before the Twelfth dynasty but also at the end of it "all good things" is used. The n of dative was attested before the epithet ms n hrw during the Heracleopolitan Period up to the Twelfth Dynasty. There are similarities in dedicatory inscription parallels between that found in tomb B3 (Senwosert I). The date is in agreement with that proposed by a number of scholars; but further examination would be needed to refine this proposed date. The same applies to the social standing and career of the tomb owner: there is no preserved titles on this chapel except the general one hity nj suggest a middle-class standing. However, analysis of other finds and archaeological contexts would provide a clearer picture of his career and social standing. It remains to ask: why this chapel which dates to the Middle Kingdom was cut I over the tomb of Pepyankh (Old Kingdom)? I suggest that Ukhhotep choose this location for these reasons: firstly, this place was the cult center of Hathor, secondly due to the dignified Pepyankh A2 and his religious status for his public priestly role. He also mentions in his texts that he inaugurate the Meir cemetery. It is clear that the Egyptians practiced some form of ancestor worship around his tomb.
