### Research Article

| S. No. | Title                                                                 | Page No. |
|-------|----------------------------------------------------------------------|----------|
| 1.    | **Constructing and comparing selection indices for early growth traits in *Saccharum spontaneum***  
        T. Lakshmi Pathy, V. Vinu, Adhini S. Pazhany and S. Karthigeyan | 1-10     |
| 2.    | **Characterization and genetic variability of wheat genotypes for polyphenol oxidase (PPO) activity***  
        A. S. Shitre, G. Vishwakarma, V. Kumar, Swati Bharad, U. G. Kachole, N. M. Magar, P. Shinde and B. K. Das | 11-20    |
| 3.    | **Pattern of genetic diversity in indigenous *Ahu* rice germplasm of Assam***  
        M. K. Sarma, A. S. Nizamuddin Ahmed, Daizi Durba Saharia, Manash P. Nath, Jugal talukdar, N. Sonia Devi, S. Dutta Deka, S. Zaman and J. Bhuyan | 21-27    |
| 4.    | **Yield stability under different agronomic situations in linseed (Linum usitatissimum L.)***  
        Kuldeep Kumar Bharatya, Niranjan Kumar Chaurasia and Ram Balak Prasad Nirala | 28-33    |
| 5.    | **Genetic analysis in advanced breeding lines of field pea (Pisum sativum L.)***  
        Masadi Sunil Kumar, N. Brajendra Singh, M. Samuel Jeberson, Kammela Seetha Ramaiah, L. Nongdrenchhomba Singh and N. Gopimohan Singh | 34-40    |
| 6.    | **Deciphering morphological and molecular insights into mothbean genotypes***  
        Jaishree Tanwar, N. V. Soni, J. R. Patel, A. B. Patel and R. K. Meena | 41-48    |
| 7.    | **Blackgram CO 7: A new high yielding and bold seeded variety suitable for Tamil Nadu***  
        P. Jayamani, A. Muthuswamy, D. Kumaresan, T. K. S. Latha, D. Rajabaskar, M. Senthivelu, S. Anitta Panish and S. Geetha | 49-55    |
| 8.    | **Identification of superior transgressive segregants in F2 and F3 populations of wheat (Triticum aestivum L.) for yield and its contributing traits***  
        Ayaz Ahamad, Sheo Pratap singh, Lal Chandra Prasad, Ravindra Prasad and Padma Thakur | 56-61    |
| 9.    | **Gene action for seed yield and its attributing traits in fieldpea (Pisum sativum L.)***  
        Seema Kamboj, Rajesh Yadav, Ravika and Theint Theint Tun | 62-68    |
| 10.   | **Studies on the genetic variability, character association and path coefficient analysis in garlic (Allium sativum L.)***  
        M. Anand, A. Sankari, P. R. Kamalkumaran and M. Velmurugan | 69-74    |
| 11.   | **Elucidation of gene action and combining ability for grain and fodder yield and contributing traits in sorghum (Sorghum bicolor (L.) Moench)**  
        A. H. Joshi, R. A. Gami, R. N. Patel and S. Arvinth | 75-82    |
| No. | Title                                                                 | Authors                                                                                                                                                                                                 | Page Range |
|-----|----------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| 12. | Analyzing genetic variations for head rice recovery under heat stress in rice (*Oryza sativa* L.) | Bharathi Ayyenar, Ameena Premnath, Mahendran Ramachandran, S. Manonmani, D. Sudhakar and Raveendran Muthurajan                                                                                      | 83-91      |
| 13. | Frequency distribution and genetic variability for forage yield attributing traits in oats (*Avena sativa* L.) | Rashmi Toppo and Mayuri Sahu                                                                                                                                                                         | 92-97      |
| 14. | CoPb 96: An early maturing sugarcane variety for Punjab               | Vikrant Singh, Kuldeep Singh, R. S. Singh, Rajinder Pal, Rajinder Kumar, Anuaradha and Chander Mohan                                                                                                 | 98-105     |
| 15. | Evaluation of different turmeric (*Curcuma longa* L.) varieties in Southern Laterites of Kerala | M. R. Bindu, P. Shinoj, A. S. Darshana, Geethu Krishnan and K. Rani Krishna                                                                                                                           | 106-111    |
| 16. | WRGE 121: A high yielding mid-early duration pigeonpea variety for Southern Zone of India | N. Sandhya Kishore, P. Jagan Mohan Rao, V. Thirumal Rao, Ch. Pallavi, G. Padmaja and M. Madhu                                                                                                         | 112-119    |
| 17. | Identification of selection parameters for evaluating superior stable genotypes of groundnut (*Arachis hypogaea* L.) | Priyanka Kumari, Shashi Kiran Tirkey, Ekhlaque Ahmad, C. S. Mahto, Jenny Priya Ekka and Swapnil                                                                                                    | 120-124    |
| 18. | OL 15: A high yielding, single cut variety of fodder oat developed for Punjab state | Rahul Kapoor, Amandeep and Harshavardan J. Hilli                                                                                                                                                     | 125-131    |
| 19. | Genetics of grain yield and its component traits in maize (*Zea mays* L.) | Parveen Gazala, Erappa Gangappa, Sampangi Ramesh, M. S. Vedashree and Rajanna Raghu                                                                                                               | 132-136    |
| 20. | Variability in *Solanum* species: Morphological characterization     | Neeraja Puthiamadom and Jiji Joseph                                                                                                                                                                   | 137-145    |
| 21. | Estimation of combining ability and heterosis for yield and its component traits for identification of promising red rice (*Oryza sativa* L.) hybrids developed from new WA-based CMS lines and red kernel breeding lines | V. Nagamani, N. Shivakumar and T. E. Nagaraja                                                                                                                                                         | 146-154    |
| 22. | Multivariate analysis in parental lines and land races of pearl millet (*Pennisetum glaucum* (L.) R. Br.) | Venkataramana. S. Kalagare, N. Meenakshi ganesan, K. Iyanar, T. Chidteshwari and C. N. Chandrasekhar                                                                                           | 155-167    |
| 23. | Genetic diversity analysis among different horticultural groups of indigenous and exotic *Citrullus* landraces using microsatellite markers | Koushik Saha, Harshawardhan Choudhary, Jayanta Jamatia and A. D. Munshi                                                                                                                           | 168-174    |
| 24. | Principal components of genetic diversity and association studies for yield related traits in pearl millet (*Pennisetum glaucum* (L.) R. Br.) | R. Narasimhulu, C. Tara Satyavathi, B. Sahadeva Reddy and B. C. Ajay                                                                                                                                 | 175-181    |
| 25. | Characterization of soybean genotypes based on morphological and molecular markers | 182-192 |
|     | Niharika Saharia and Ramendra Nath Sarma |
| 26. | Studies on genetic variability, heritability, correlation and path coefficient analysis in curry leaf (Murraya koenigii Spreng.) genotypes | 193-197 |
|     | Dharini Chittaragi, M. Ananthan, K. Venkatesan, L. Mahalingam and P. Jeyakumar |
| 27. | Genetic diversity analysis of selected mulberry accessions using microsatellite markers | 198-207 |
|     | Suraksha Chanotra, Romesh Kumar Salgotra, Ramesh Kumar Bali and Kamlesh Bali |
| 28. | Assessment of genetic variability, correlation and path analysis in sesame (Sesamum indicum L.) | 208-215 |
|     | Vivek Kumar, Sima Sinha, Satyendra, Sweta Sinha, Ravi Shankar Singh and S. N. Singh |
| 29. | Genetic analysis in Saccharum spontaneum accessions of Maharashtra collection | 216-224 |
|     | C. Jayabose, V. Anusheela, S. Karthigeyan, P. Govindaraj and A. K. Rema Devi |

**Research Note**

| 30. | Determination of optimum plant characters in safflower (Carthamus tinctorius L.) under rice based late sown condition | 225-229 |
|     | Bhaskar Chandra Sahoo, Rajeev Shrivastava and Hemlata Ohdar |
| 31. | Genetic diversity in working germplasm collection of kabuli chickpea (Cicer arrietinum L.) | 230-234 |
|     | V. Jayalakshmi, S. Rama devi and M. Mohammed Imran |
| 32. | Genetic variability, correlation and path analysis in mango ginger (Curcuma amada ROXB.) | 235-242 |
|     | Raval Kalpesh, R. K. Patel, Rajesh Panchal and K. G. Modha |
| 33. | Potential groundnut pre-breeding genotypes with resistance to Aspergillus flavus | 243-248 |
|     | Gopalakrishna K. Naidu, Sameer B. Dange and H. L. Nadaf |
| 34. | Genetic studies on variability for quantitative traits in finger millet (Eluesine coracana L. Gaertn) | 249-252 |
|     | S. Divya, K. Geetha, R. Siva kumar, A. Nirmala Kumari and M. Rajesh |
| 35. | Correlation coefficient and path analysis for yield traits in coriander (Coriandrum sativum L.) genotypes | 253-257 |
|     | M. Anil Kumar, Gulab Choudhary, O. P. Garhwal and Manju Netwal |
| 36. | Genetic divergence for grain yield and its components in bread wheat (Triticum aestivum L.) | 258-261 |
|     | J. Pranay Reddy, Mandeep Kumar, Nidhi Dubey, Harshal Avinashe, Kachakayala Rohith and Swapnil Kalubarme |
| 37. | Correlation and path-coefficient analysis for yield and yield components of tamarind (Tamarindus indica L.) genotypes | 262-266 |
|     | G. K. Pooja, Nagarajappa Adivappar and B. S. Shivakumar |
|   | Title                                                                 | Authors                                      | Pages       |
|---|------------------------------------------------------------------------|----------------------------------------------|-------------|
|38.| Genetic variation in black pepper (Piper nigrum L) accessions for piperine, essential oil and oleoresin, the biochemical principles of quality | K. M. Prakash and Jiji Joseph                 | 267-272     |
|39.| Gene action and combining ability analysis for kernel yield and its attributing traits in maize (Zea mays (L.)) | R. M. Patel                                  | 273-278     |
|40.| Genetic divergence in finger millet (Eleusine coracana L.)             | Bezawada Tarun Reddy and V. Vengadessan     | 279-285     |
