International scientific journal published quarterly.
The Turkish Journal of Neurology has been published quarterly in March, June, September and December as the official journal of the Turkish Neurological Society since 1995. The journal has been also available online since 2004. A peer-reviewed system is used to select manuscripts for publication. The journal is published in Turkish and English languages (http://tjn.org.tr/). Original research articles are particularly supported and encouraged.

The journal aims to update knowledge of neurology throughout Turkey and region with research articles, reviews, case reports, short communications, letters to the editor, and clinical images in the field of neurology. To retain interdisciplinary transfer of information between the areas of neuroscience and to undertake a novel effort in the international representation and attribution of published articles are the other aims of the journal.

The target readers of the Turkish Journal of Neurology include neurologists and neurology residents as well as other physicians working in the field of neurological sciences.

Turkish Journal of Neurology is indexed in Web of Science; Emerging Sources Citation Index (ESCI), Directory of Open Access Journals (DOAJ), Embase, Chemical Abstracts Service (CAS), Index Copernicus, EBSCOhost Research Databases, CINAHL Complete, Scopus, ProQuest, Gale/Cengage Learning, British Library, Tübitak/Ulakbim TR Dizin, Turkey Citation Index, Türk Medline.

Open Access Policy
This journal provides immediate open access to its content on the principle that making research freely available to the public supporting a greater global exchange of knowledge.

Open Access Policy is based on rules of Budapest Open Access Initiative (BOAI) http://www.budapestopenaccessinitiative.org/. By “open access” to [peer-reviewed research literature], we mean its free availability on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the full texts of these articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose, without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself. The only constraint on reproduction and distribution, and the only role for copyright in this domain, is right of authors to retain control over the integrity of their work and the right to be properly acknowledged and cited.

This journal is licensed under a Creative Commons 4.0 International License.

Permission Requests
Permission required for use any published under CC-BY-NC-ND license with commercial purposes (selling, etc.) to protect copyright owner and author rights. Republication and reproduction of images or tables in any published material should be done with proper citation of source providing authors names; article title; journal title; year (volume) and page of publication; copyright year of the article.

Instructions for Authors
Instructions for authors are published in the journal and are accessible via www.tjn.org.tr

Material Disclaimer
Scientific and legal responsibilities pertaining to the papers belong to the authors. Contents of the manuscripts and accuracy of references are also the author’s responsibility. The Turkish Neurological Society, the Editor, the Editorial Board or the publisher do not accept any responsibility for opinions expressed in articles.

Financial expenses of the journal are covered by Turkish Neurological Society.

Subscriptions
The Turkish Journal of Neurology is delivered complimentarily to the members of Turkish Neurological Society and other scientists and physicians interested in neurology. Tables of contents, abstracts and full texts of all articles published are accessible free of charge through the web site www.tjn.org.tr since 2004. For subscriptions, please contact the Turkish Neurological Society.

The journal is printed on acid-free paper.
The Turkish Journal of Neurology is the periodical publication of the Turkish Neurological Society, which is published quarterly (March, June, September, December).

The Journal’s publication languages are Turkish and English. Manuscripts in Turkish should comply with the Turkish Dictionary and Spelling Dictionary of Turkish Language Association (http://tdk.org.tr).

Anatomic terminology should be based on Latin nomenclature. Medical terms that have established use in everyday medical language should be written as they are read in accordance with Turkish spelling rules. Quotation marks should be used for terms written in English or other foreign languages.

Turkish Journal of Neurology is indexed in Web of Science; Emerging Sources Citation Index (ESCI), Directory of Open Access Journals (DOAJ), Embase, Chemical Abstracts Service (CAS), Index Copernicus, EBSCOhost Research Databases, CINAHL Complete, Scopus, British Library, Tübitak/Ulakbim TR Dizin, Turkey Citation Index, Türk Medline Hiniari, QUARE, ARDI, GOALI.

The Turkish Journal of Neurology does not charge any fees for submission or processing of manuscripts. All expenses are covered by Turkish Neurological Society.

Ethical Issues and Peer Review
The Turkish Journal of Neurology is an independent, non-biased, periodical publication that adheres to the double-blind peer review process.

The Publication Policy and Manuscript Writing Rules were prepared in accordance with the Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals (ICMJE Recommendations) (2016, http://www.icmje.org).

Submitted manuscripts are first evaluated for their scientific value by the Editor-in-Chief. After initial evaluation, regarding to article’s topic one of the associate editors is assigned. Then, manuscripts are sent to at least two peer reviewers for evaluation. The Editorial Board may also send the manuscript to another reviewer if necessary. All reviewers are independent national and international experts in the field. After peer-review process, associate editor adds his/her own comments to the peer reviews and send them to the Editor-in-Chief. Editor-in-Chief considers peer-reviewers’ and associate editor’s comments and commits his/her final decision. The whole evaluation process is aimed to be finished within 3 months. Every submission is also evaluated by the statistics editor.

Dates, when the manuscript was received and accepted, are stated in the issue the manuscript is published.

The Editor-in-Chief and associate editors have the right to reject, return manuscripts for revision, or revise the format of manuscripts that do not comply with publication rules.

Turkish Journal of Neurology declares to principally comply with the ethical standards of the Declaration of Helsinki (https://www.wma.net/policies-post/ wma-declaration-of-helsinki-ethical-principles-for-medical-research-involving-human-subjects/). Therefore, all studies that involve human subjects, patients or volunteers should be informed and their consents should be taken (You can reach the Informed Consent of Publication in Turkish Journal of Neurology from here). This information should be provided in the “Materials and Methods” section of the manuscript. In cases of image media usage that potentially expose patients’ identity requires obtaining permission for publication from the patients or their parents/guardians. Studies involving animals must contain a statement indicating that the study was performed in compliance with principles of the Guide for Care and Use of Animals (www.nap.edu/catalog/5140.html). Approval must be provided from Institutional Ethics Committee (including approval number). The Editor-in-Chief may ask for a copy of the documents if necessary.

Authors should provide declarations of financial or material support if received for the study and manuscript preparation. Authors are required to provide a statement on the absence of any conflict of interest.

All manuscripts submitted to the journal for publication are checked by Crossref Similarity Check powered by “iThenticate” software for plagiarism. If plagiarism is detected, relevant institutions may be notified. In this case, the authors might be asked to disclose their raw data to relevant institutions.

The scientific and legal responsibility for manuscripts sent to our journal for publication belongs to the authors. Authors are responsible for the correctness of opinions, recommendations, and references in their manuscripts. Copyrights of manuscripts accepted for publication belong to Galenos Yayin. After acceptance of the manuscript for publication, and a related e-mail to correspondence author via the Online Article System a Copyright Transfer Form should be completed, signed by all authors, and sent to yayin@galenos.com.tr (No payment is made to the authors for copyright).

All manuscripts submitted for publication should be prepared in accordance with the Uniform Requirements for Manuscripts Submitted to Biomedical Journals Editors (http://www.ulakbim.gov.tr/cabim/vt/uvr/tip/) as prepared by the International Committee of Medical Journal Editors (ICMJE).

Authors are required to accept that editors and associate editors can make revisions to the manuscript without making a major change in the manuscript. If the manuscript includes a commercial link or if an institution provides material support to the study, authors should inform the editor about the presence and type (consultant, other agreements) of the relationship with the product, drug, or company.

In the event of any suspicion or claim regarding scientific shortcomings or ethical infringement, the Journal reserves the right to submit the manuscript to the supporting institutions or other authorities for investigation. The Journal accepts the responsibility of initiating action but does not undertake any responsibility for an actual investigation or any power of decision.

Preparation of original articles, systematic reviews, meta-analyses, and case reports must comply with study design guidelines: CONSORT statement for randomized controlled trials (Moher D, Schultz KF, Altman D, for the CONSORT Group. The CONSORT statement revised recommendations for improving the quality of reports of parallel-group randomized trials. JAMA 2001; 285: 1987-91) (http://www.consort-statement.org/).

PRISMA Statement of preferred reporting items for systematic reviews and meta-analyses (Moher D, Liberati A, Tetzlaff J, Altman DG, The PRISMA Group. Preferred Reporting Items for Systematic Reviews and Meta-Analyses: The PRISMA Statement. PLoS Med 2009; 6(7): e1000097.) (http://www.prisma-statement.org/).

STARD checklist for the reporting of studies of diagnostic accuracy (Bossuyt PM, Reitsma JB, Bruns DE, Gatsonis CA, Glasziou PP, Irwig LM, et al., for the STARD Group. Towards complete and accurate reporting of studies of diagnostic accuracy: the STARD initiative. Ann Intern Med 2003;138:40-4.) (http://www.stard-statement.org/).

STROBE statement, a checklist of items that should be included in reports of observational studies (http://www.strobe-statement.org/).

MOOSE guidelines for meta-analysis and systematic reviews of observational studies (Stroup DF, Berlin JA, Morton SC, et al. Meta-analysis of observational studies in epidemiology: a proposal for reporting Meta-analysis of
INSTRUCTIONS TO THE AUTHORS

Observational Studies in Epidemiology (MOOSE) group. JAMA 2000; 283: 2008-12).

CARE guidelines are designed to increase the accuracy, transparency, and usefulness of case reports. (Gagnier JJ, Kienle G, Altman DG, Moher D, Sox H, Riley D; the CARE Group. The CARE Guidelines: Consensus-based Clinical Case Reporting Guideline Development.) (http://www.care-statement.org/)

General Rules

TJN accepts only online submissions (www.tjn.org.tr). To submit an article, authors should subscribe to the Journal Agent website (http://www.tjn.org.tr) and obtain a personal password. This system enables online submission and evaluation of the manuscript. Collected articles are processed and archived by this system in compliance with principles of ICMJE, Index Medicus (Medline/PubMed), and Science Citation Index (SCI). The ORCID (Open Researcher and Contributor ID) number of the corresponding author should be provided while sending the manuscript. Free registration can be created at http://orcid.org.

Paper layout:
The manuscript should be written in Verdana font, 10 point-type, double-spaced with 2 cm margins on both sides. The text should be prepared with a computer program compatible with Windows operating system. Page numbers should be used starting from the initial page, and page numbers should be at the bottom right corner of each page. The main manuscript file should not include author names or their institutions.

Abbreviations: Abbreviations used in the journal should be nationally or internationally accepted, should be defined in the text when first used, and written in parenthesis. Afterwords, the abbreviation should be used throughout the text. A Turkish source ‘Bilimsel Bir Makale Nasıl Yazılır ve Yayınılmaz? (How to write and publish a scientific article?)’ can be referred for international abbreviations.(https://ulakbim.tubitak.gov.tr/sites/images/Ulakbim/eyes2_yazar_.pdf)

Title page: Title page should include Turkish and English titles, Turkish and English running titles shorter than 40 characters including spaces, the names and, last names of the authors. The clinic, department, institution, and organization in which the study was conducted should also be stated. Corresponding author’s name, address, e-mail, phone, and fax numbers should also be included on the title page. Previous presentations of the study in symposia or congresses should also be stated.

Any financial or other support from any person or institution should be mentioned under the heading of Conflict of Interest. Also in studies with multiple authors, the roles of every author should be defined.

Turkish Journal of Neurology expects that every author meets at least one of the following internationally accepted criteria:
1. Contributed in the preparation of the project, or obtained, analyzed or interpreted data of the study,
2. Made a significant contribution to writing or intellectual development of the article,

Additionally, all of the authors should give consent to correctness, originality, and wholeness of the study (http://www.icmje.org/recommendations/browse/roles-and-responsibilities/defining-the-role-of-authors-and-contributors.html).

Pictures, tables, graphs, and figures

Tables should be prepared to explain the text and not be a repetition of text or figures. Caution must be exercised in order not to send color pictures, graphs, or figures.

Pictures: X-ray films, computed tomography and magnetic resonance imaging, other diagnostic images, and pictures of pathology specimens should be sent in 127-173 mm dimensions and high quality. There should not be any text on images and radiologic images. Lesions must be indicated with black arrows on a white background or white arrows on a dark background. Letters, numbers, and symbols on pictures should be clear, consistent throughout, and large enough to be legible when the picture is reduced for publication. Pictures should be as self-explanatory as possible. When pictures or images of patients are used, the patients’ names and eyes should be censored to prevent identification, and consent should be obtained from the patient or his/her legal representatives. Legends for illustrations should be written using double-spacing starting on a separate page, and Arabic numerals should be used for corresponding illustrations. When symbols, arrows, numbers or letters are used to identify parts of illustrations, each should be explained in the legend. Patients’ names should not be written in pictures and omitted from radiologic images.

Pictures should be numbered according to the sequence of referral within the text, and a short title should be written for each picture. When a picture from another source is used, permission of the author and publisher must be obtained and sent to the journal. Details of photographs should be distinguishable; they should be recorded in JEPG format and at least 300 pixels/inch resolution.

Tables, graphs, and figures: Each table should be prepared with double-spacing on a separate page. Tables should have a brief title. Explanations should be made in footnotes instead of heading. Explanations should be made for all nonstandard abbreviations in footnotes. If decimal numbers are used, it must be separated with comma in Turkish articles and dot in English articles. Use only one decimal-digit after comma or dot, except specific numbers (e.g., p-value). The following symbols should be used in footnotes in sequence: *, †, ‡, §, ¶, ‌, ††, ‡‡, ¶¶. Each table should be cited in the text.

Figures and graphs should be drawn professionally or photographed and should be of photographic quality when digitally recorded. Electronic files of figures or graphs should be sent in JPEG, or GIIF format that will produce high-quality images and the quality of the files should be checked on a computer screen before submission. In radiologic monitorings such as magnetic resonance imaging or computerized tomography of the patient, the writing around the image should be redacted with appropriate software (such as Photoshop) and the images should be surrounded by black color. In radiologic images, information such as the location of the shot, the name of the patient, the date of shot should be removed with the help of appropriate software without disturbing the image quality or destroying the image. If the article contains tables, graphs, figures or pictures from a previously published article, written consent should be obtained from the authors and copyright owners, and this should be stated.

Manuscript Types

Original Article

Original articles include clinical research, clinical observation, new methods, and experimental and laboratory studies. Original articles should include title, abstract, keywords related with the main topic of the study, introduction, materials and methods, results (findings), discussion, conclusion, acknowledgments, references, tables, graphs, and pictures. Title, abstract, and keywords should be both in Turkish and English. Original articles should not exceed 5000 words and 40 references.
INSTRUCTIONS TO THE AUTHORS

Title page: The page that includes the title of the article, author names, and information about the authors.

Abstract: Turkish and English abstracts should be included in original articles, case reports, and reviews. Abbreviations should be avoided in abstracts if possible. In this section, there should be no references, figures, tables, or citations. Abstracts should mention the main topics of the article and not exceed 300 words. The English abstract should be structured to include “Objective,” “Materials and Methods/Patients and Methods,” “Results,” and “Conclusion” sections.

In original articles, the Abstract should include the following five subheadings:
1. Objective: The aim of the study should be identified.
2. Materials and Methods: The study should be defined, inclusion criteria, whether it was randomized, retrospective or prospective, and statistical methods should be stated.
3. Results: Detailed results of the study should be given, and the level of statistical significance should be stated.
4. Conclusion: The conclusion should reflect the study results, define clinical usefulness, and show strengths and limitations.
5. Keywords: At least 3 and no more than five keywords should be included at the end of abstracts. Standard terminology should be used for keywords. Medical Subject Headings (MeSH) can be used for writing keywords (www.nlm.nih.gov/mesh/MBrowser.html)

Original articles should include the following sections:
1. Introduction: Concise information should be given about the topic, the aim of the study should be stated, and these should be supported by the literature.
2. Materials and Methods: The study plan should be given, whether randomization was made, prospective or retrospective nature of the study, number of subjects, and inclusion and exclusion criteria should be explained.
3. Results: Results, tables, and figures should be given, and the results should be evaluated considering statistical methods used in the study. Writing rules about visual material can be found under “General Rules” in the section of “Pictures, Tables, Graphs, and Pictures.”
4. Discussion: Results should be discussed with strengths and limitations, and compared with the literature.
5. Conclusion: Conclusions of the study should be emphasized in one or two paragraphs.
6. Acknowledgment: Any conflict of interest, financial support, donation, or other editorial and/or technical support (statistical analysis, English/Turkish evaluation) should be stated at the end of the text. Every person who contributed to the article by technical support, writing and proofreading of the article, data collection, and/or analysis but do not meet the criteria to be an author should be mentioned in the acknowledgment section.
7. References: References should include recent publications when possible. Authors are responsible for the correctness of references. Information about writing rules for references can be found in the “References” subsection of the “General Rules” section.

Review Articles
A review evaluates a current topic in detail independently without overemphasizing a particular opinion. As reviews to be published in the Journal are planned by the Editor-in-Chief, authors of any reviews other than those invited should obtain approval of the Editor-in-Chief before submission to the Journal. Reviews should include a title page in Turkish, abstract in Turkish, keywords in Turkish (minimum 3, maximum five keywords), title in English, abstract in English, and keywords in English. The Abstract of a review should be prepared as a single paragraph and limited to 300 words. There is no need to structure the abstract. Reviews should not exceed 8000 words. Also, the number of references should be less than 100.

Case Report
Case reports should include cases that are rarely seen, unique in diagnosis or treatment, and add new information to the scientific knowledge.

Case reports should include a title in Turkish, abstract in Turkish, keywords in Turkish, title in English, abstract in English, keywords in English, introduction, case, discussion, and references. The introduction and discussion should be concise in case reports, and a single paragraph abstract that does not exceed 300 words should be prepared. A structured abstract is not necessary. Case reports should not exceed 2500 words, and it should not have more than 15 references.

Short Communication
Reports representing a significant contribution in the related field may be concisely documented as a short communication. Short communications should include titles in Turkish and English, abstracts in Turkish and English as single paragraphs, and 2-5 keywords in Turkish and English. There is no need to prepare a structured abstract. The maximum length of a short communication is 1500 words, and tables and a no more than two figures/graphs/pictures should be included. References should be limited to 10.

Letter to the Editor
These letters address issues or exchange views on topics arising from published articles. They should be concise, not exceed 750 words, should not include an abstract, and references should be limited to 5. It is not acceptable to be included a subheading on a letter to the editor manuscript. Short case reports may also be published under this heading.

Images in Clinical Neurology
Under this heading, images of rare neurologic conditions are published. The number of references should be less than 100.

Case Reports
Case reports should include cases that are rarely seen, unique in diagnosis or treatment, and add new information to the scientific knowledge.

Meeting Highlights
Under this heading national or international meetings, congresses or symposiums in neurology, neurological sciences, or clinical neurology can be presented. Prominent scientific findings in these meetings should be summarized. Manuscripts submitted under this heading should be sent as a single text without exceeding 500 words. No references should be used in this section.
INSTRUCTIONS TO THE AUTHORS

Frontiers in Neurology
This section includes comments about articles that have been published in the previous year and believed to be essential for its field. Manuscripts should include at most a figure or a table. These manuscripts are not just translations of the articles. Prominent findings of the article should be summarized, and they should be compared with previous scientific literature. Manuscripts should not include subsections, and three references at the most should be included.

References
- Data and manuscripts that have not yet been published should not be cited as references. These should be stated in the main text as “author(s), unpublished data, year.”
- Reference numbers should be given in the text at the end of the sentence in parentheses, and at the end of the manuscript, they should be numbered consecutively in the order in which they are mentioned in the text. Journal names should be abbreviated as listed in “Index Medicus” or “Turk Tübitak Ulakbim TR Index.” References should be written in accordance with following examples:

Journal Articles;
First letters of names and surnames of the authors (If number of authors is less than 6, list all authors. If the number exceeds 6, list first 3 authors followed by et al). Title of article. Abbreviated title of the journal according to Index Medicus (http://www.ncbi.nlm.nih.gov/sites/entrez/query.fcgi?db=nlmcatalog). Year of publication; Volume: first-page number-Last page number.
Example: Wertman E, Zilber N, Abramsky O. An association between MS and type 1 diabetes mellitus. J Neurol 1992;239:43-45.

Supplement;
First letters of names and surnames of the authors. Manuscript title. Abbreviated title of the journal according to Index Medicus (http://www.ncbi.nlm.nih.gov/sites/entrez/query.fcgi?db=nlmcatalog). Year of publication; Volume (supplement number): first-page number-Last page number.
Example: Wasylewski DA. The cost of schizophrenia. Can J Psychiatry 1994;59(Suppl 2):65-69.

Book;
First letters of names and surnames of the authors. Book title. Number of edition. City of publication: Publisher; Year of Publication.
Example: Ropper AH, Brown RH. Adams and Victor’s Principles of Neurology. 8th ed. New York: McGraw-Hill, 2005.

Book Chapter;
First letters of surnames and names of chapter editors. Chapter title. In: First letters of surnames and names of editors (eds). Book title. Edition number. City of publication: Publisher, Year of Publication. Number of the first page of the chapter- number on the last page.
Example: Pender MP. Multiple sclerosis. In: Pender MP, McCombe PA (eds). Autoimmune Neurological Diseases. 3rd ed. Cambridge: Cambridge University Press, 1999:85-154.

Congress presentation;
First letters of surnames and names of the authors (all authors should be written). Manuscript title. In: First letters of surnames and names of the authors (eds). Book title. Name of the meeting; City where the meeting took place, country where the meeting took place. Publisher; Year. Page number.
Example: Bengtsson S, Solheim BG. Enforcement of data protection, privacy, and security in medical informatics. In: Lun KC, Degoulet P, Piemme TE, Reinhoff O (eds). MEDINFO 92. Proceedings of the 7th World Congress on Medical Informatics; 1992 Sep 6-10; Geneva, Switzerland. North-Holland; 1992. p. 1561-1565.

Journal published electronically;
First letters of surnames and names of the authors (all authors should be written). Article title. Abbreviation of the Journal according to Index Medicus. Year; Volume(Number). Available from: URL address. Access date: Day. Month. Year.
Example: Morse SS. Factors in the emergence of infectious disease. Emerg Infect Dis 1995;1(1). Available from: URL: http://www.cdc.gov/ncl-doc/EID/ eids.htm. Accessed date:25.12.1999.

Website;
The name of the website. Access date. Available from: Address of the Web site. World Health Organization (WHO). Access Date: 9 July 2008. Available from: http://www.who.int

Thesis;
First letters of authors surname name. Thesis title. Name of the city: university; year.
Example: Kanpolat Y. Trigeminal Gangliona Deneysel Perkütan Giriş ve Radyofrekans Termik Lezyonun Histopatolojik Değerlendirilmesi (Doçentlik Tezi). Ankara: Ankara Üniversitesi; 1978.

Correction/Retraction
Authors must contact Editor-in-Chief in case of correction or retraction. For correction, the erratum, with all related information on previous and corrected data, will be published in the next issue upon notification of authors. Paper may be retracted in case of e.g. major miscalculation. Authors must contact Editor-in-Chief with official letter signed by all authors. To be successfully retracted, all authors must give the consent.

Copyright
Copyright belongs to the Galenos Publishing House. All contents are under CC BY-NC-ND license and available free of charge from the journal’s website at www.tjn.org.tr
Authors of paper are free to use, store and reproduce (e.g. lecture) their works under CC BY-NC-ND license. For all other purposes, the appropriate permission must be asked for.

Online Archiving
All published articles are archived in Journal’s website, Journal’s Online Submission System, Ulakbim TR Dizin and other national and international indexes with their own repository systems.

The Turkish Journal of Neurology is an independent, non-biased, periodical publication that adheres to the double-blind peer review process. The Publication Policy and Manuscript Writing Rules were prepared in accordance with the Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals (ICMJE Recommendations) (2016, http://www.icmje.org).

Submitted manuscripts are first evaluated for their scientific value by the editor. After initial evaluation, regarding to article’s topic one of the associate editors is assigned. Then, manuscripts are sent to at least two peer reviewers for evaluation. The Editorial Board may also send the manuscript to another reviewer if necessary. All reviewers are independent national and international experts in the field. After peer-review process, associate editor adds his/her own comments to the peer reviews and send them to the Editor-in-Chief. Editor-in-Chief considers peer-reviewers’ and associate editor’s comments and commits his/her final decision. The whole evaluation process is aimed to be finished within 3 months. Every submission is also evaluated by the statistics editor.

Dates when the manuscript was received and accepted are stated in the issue the manuscript is published.

The Editor-in-Chief and associate editors have the right to reject, return manuscripts for revision, or revise the format of manuscripts that do not comply with publication rules.

For all complaints and appeals please contact Editorial Office. A complaint will be reviewed by Editor and the action will be taken. Whenever the investigation is completed and the decision will be made, the complainant will be notified upon the decision.

Turkish Journal of Neurology must get informed about the manuscripts which requested to withdraw including the justifications. The decision is made in accordance with the editorial policies.

Ethical Issues

For the experimental, clinical and drug human studies, approval by ethical committee and statement on the adherence of the study protocol to the international agreements (Helsinki Declaration revised 2013 (https://www.wma.net/policies-post/wma-declaration-of-helsinki-ethical-principles-for-medical-research-involving-human-subjects/) are required. In experimental animal studies, the authors should indicate that the procedures followed were in accordance with animal rights (Guide for the care and use of laboratory animals, www.nap.edu/catalog/5140.html) and they should obtain animal ethic committee approval.

All collected data will not be shared with third-party person, organization or any other affiliation. Authors’ personal data (excluding corresponding author; it is stated in each article) is protected. Patients’ personal data will not be disclosed.

The Ethic Committee approval document should be submitted to the Turkish Journal of Neurology together with the manuscript.

The approval of the ethic committee, statement on the adherence to international guidelines mentioned above and that the patients’ informed consent is obtained should be indicated in the ‘Material and Method’ section and is required for case reports whenever used data/media could reveal identity of the patient. The declaration of the conflict of interest between authors, institutions, acknowledgement of any financial or material support, aid is mandatory for authors submitting manuscript and the statement should appear at the end of manuscript. Reviewers are required to report if any potential conflict of interest exists between reviewer and authors, institutions. All editors are experts in their own fields; therefore, all possible conflicts of interest are prevented. In case of any, Editor-in-Chief will take the action according to COPE Guidelines.

Plagiarism: To re-publish whole or in part the contents of another author’s publication as one’s own without providing a reference.

Fabrication: To publish data and findings/results that do not exist.

Duplication: Use of data from another publication, which includes re-publishing a manuscript in different languages without citing.

Salamisation: To create more than one publication by dividing the results of a study preternaturally.

We use Crossref Similarity Check powered by "iThenticate” to screen all submissions for plagiarism before publication. We disapproval upon such unethical practices as plagiarism, fabrication, duplication, and salamisation, as well as efforts to influence the review process with such practices as gifting authorship, inappropriate acknowledgements, and references. In case of suspicion, the authors will be asked for additional explanation. Further actions will be made according to COPE Flowcharts.

Additionally, authors must respect participant right to privacy. On the other hand, short abstracts published in congress books that do not exceed 400 words and present data of preliminary research, and those that are presented in an electronic environment are not accepted pre-published work.

Authors in such situation must declare this status on the first page of the manuscript and in the cover letter. (The COPE flowchart is available at: http://publicationethics.org)
