Movies S1 to S3
**Video Captions**

**Video S1.** Three dueteroconchs with overlapping rhizopodial networks. Video is magnified at 20x and presented at 20x natural speed. Note that while dueteroconchs do not appear to actively interact with each other, the individual on the lower left is interacting with a detrital particle.

**Video S2.** Juvenile interacting with and failing to ingest an intact algal cell. Video is magnified at 20x and presented at 20x natural speed.

**Video S3.** Neanic foraminifer floating and actively gathering detrital material against its shell. Video is magnified at 20x and presented at 20x natural speed.
