Supplementary table 1 Results of automated metastasis-detection with the differential and ratio methods

|                  | Metastasis-positive | Metastasis-negative | Total |
|------------------|---------------------|---------------------|-------|
| Differential method | Positive            | 32                  | 9     | 41    |
|                   | Negative             | 9                   | 273   | 282   |
|                   | Total                | 41                  | 282   | 323   |

|                  | Metastasis-positive | Metastasis-negative | Total |
|------------------|---------------------|---------------------|-------|
| Ratio method     | Positive            | 32                  | 11    | 43    |
|                  | Negative             | 9                   | 271   | 280   |
|                  | Total                | 41                  | 282   | 323   |

n = 323 LNs from 64 patients
