Abstract. This paper understands the current situation of teaching and management of political thought theory courses in Colleges, based on computer technology deeply analyses the development of political thought education in Colleges, and understands the opportunities and difficulties faced by the development of Political thought education in Colleges. On this basis, it puts forward how to innovate the strategies of Political thought education in Colleges.

Keywords: Political Thought Education, Innovation, Development, Computer Technology

1. Introduction
Political thought education in Colleges has always been the focus of attention of experts and scholars. The development of Political thought education in Colleges has been affected by many factors. In each development period, political thought education in Colleges will face opportunities and challenges. However, political thought education in Colleges as a way of education with Chinese characteristics, political thought educators must find its contemporary point of convergence, adapt to the requirements of the times, real-time innovation of Political thought education in Colleges. Therefore, political thought education in Colleges should be in line with reality, conform to the trend of the times, and constantly cultivate more high-quality reliable successors and qualified builders of socialism for the motherland[1].

2. The Development Dilemma of Political thought Work in Colleges
As the way of information dissemination has undergone tremendous changes, the traditional political thought work in Colleges relying on classroom teaching is facing serious challenges, which are manifested in the following aspects: lack of ideological innovation, inadequate mode innovation, lagging mechanism innovation, low efficiency, weak sustainability and low effectiveness of Political thought work in Colleges, which is not conducive to the sustainable development of Political thought
work in Colleges in China\cite{2}. As shown in table 1.

**Table 1.** The Development Dilemma of Political thought Work in Colleges.

2.1. Lack of Ideological Innovation and the Timeliness of Political thought Education in Colleges

Lack of innovative ideas and inefficient timeliness of Political thought education in Colleges are common problems faced by political thought work in Colleges under the new media environment. For a long time, the content of Political thought education in Colleges in our country has been copying textbooks. Teachers' teaching in class is also copying textbooks. Some political thought teachers in Colleges have not updated PPT even for several years\cite{3}. They still teach students the content of Political thought education in textbooks.

2.2. Insufficient model innovation and weak sustainability of Political thought education in Colleges

Insufficient mode innovation and weak continuity of Political thought education in Colleges are the key crux of Political thought work in Colleges under the new media environment. The innovation of the mode can not only enhance the enthusiasm of college students for political thought education, but also enhance the influence of ideological and political education in Colleges\cite{4}. However, from the current system of Political thought education in Colleges, there is insufficient innovation momentum in the mode of Political thought education in our country, which can not effectively use the power of new media to promote the innovation of Political thought education.

3. Research on the Innovative Development Path of Political thought Education in Colleges

As shown in table 2, a detailed analysis is presented below.

**Table 2.** Research on the Innovative Development Path of Political thought Education in Colleges.

|Changing Ideological and Political Education Concepts and Exploring Guiding Ideological and Political Education Thoughts |
|Enriching the Means of Ideological Education and Exploring Diversified Ways of Ideological and Political Education|
3.1. Changing Political thought Education Concepts and Exploring Guiding Political thought Education Thoughts
Changing political thought education concepts and exploring guiding political thought education ideas are the core premise and important basis for improving the effectiveness of Political thought education in Colleges. Freedom, sharing and opening are important spiritual connotations of new media. Political thought education in Colleges should fully absorb the advantages of new media\cite{5}. We should change our educational thinking from "indoctrination" to "guidance" instead of one-way reasoning to students. Instead, we should introduce scenario-based teaching, let students judge right and wrong by themselves, give them a free and open learning environment, and fully share the contents, methods and methods of education, so as to truly contribute to improving the effectiveness of Political thought education in Colleges.

3.2. Enriching the Means of Ideological Education and Exploring Diversified Ways of Political thought Education
Enriching the means of Political thought education and exploring diversified ways of Political thought education are the key links and inevitable measures to improve the effectiveness of Political thought education in Colleges. Therefore, the political thought education in Colleges should not be confined to the classroom in form, the content and the method. Therefore, we should use the power of new media to break through the limitations of classroom, textbooks and class hours, including the following aspects:

Breaking through the limitation of classroom education is not only to help students learn theoretical knowledge in classroom, but also to take students to participate in social practice, to analyze the role and advantages and disadvantages of new media, so as to truly understand the rationality and justice of Political thought education, and to know how to distinguish the truth and falsehood of information in new media, so as to enable students to study political thought education and new media information.

We should break through the limitations of textbooks, use the power of new media to educate students in the form of audio and video, so that the political thought education topics become attractive, only in this way can the political thought education classroom in Colleges have vitality.

3.3. Attention to ideological education and propaganda, and explore the mode of Political thought propaganda by self-Media
Paying attention to ideological education propaganda and exploring self-Media political thought propaganda mode are beneficial supplements and important guarantees to improve the effectiveness of Political thought education in Colleges. At present, although the major colleges pay attention to the promotion of Political thought education, they are confined to the classroom, which plays a limited role. Therefore, in the future, political thought education in Colleges should focus on the use of new media for dissemination, such as investing resources to build the party, the Youth League Committee's micro-blog, the Weeing public number, and so on, and its operation should be carried out.

4. Conclusion
In a word, in the computer new era, in order to improve the effectiveness, timeliness and effectiveness of Political thought education in Colleges, we must explore innovative ways of Political thought
education in Colleges. Based on the computer-aided technology, the article believes that political thought education in colleges should: First, change the concept of Political thought education, adopt "guiding" teaching ideas, cultivate students' ability to distinguish right from wrong, and make freedom and openness an important concept of Political thought education. Secondly, we should enrich the means of Political thought education, form diversified ways of Political thought education, improve the effectiveness of Political thought education propaganda, make use of the characteristics of efficient dissemination of new media, and achieve the objectives of Political thought education. Thirdly, it should pay attention to ideological education and propaganda so as to truly improve the timeliness of Political thought education in Colleges, so as to achieve the basic goal of maintaining the mainstream ideological position[6].
