This is an erratum to the paper ‘The escape velocity curve of the Milky Way in Modified Newtonian Dynamics’, published in MNRAS, 473 (1), 419 – 430 (2018).

Equation 11 in that paper should be replaced with the equation below.

\[
g \rightarrow g + \frac{2GM_{\text{ext}}}{15r_{\text{out}}^3} (r - 3r \cos \theta \hat{g}_{\text{ext}}), \text{ where } \hat{g}_{\text{ext}} = \frac{g_{\text{ext}}}{|g_{\text{ext}}|}
\]

As this was a purely typographical error, the results and discussion in the original publication are completely unaffected.

This paper has been typeset from a \TeX/\LaTeX file prepared by the author.
