Supplemental Table 2. Presenting clinical examination data stratified by diagnosis.

Data presented are median (+/- range) for continuous variables or number affected per total (percent affected). The number of horses in each group for which data were available is indicated.

|                   | ECoV  (n=8) | Salmonella  (n=12) | Unknown  (n=22) |
|-------------------|-------------|--------------------|-----------------|
| Heart Rate (beats/min) | 47 (40-56)  | 50 (32-80)         | 50 (32-88)      |
| Respiration (breaths/min) | 22 (12-56)  | 24 (12-60)         | 20 (12-50)      |
| Temperature (°F)   | 100.7 (99.1-104.0) | 100.0 (98.6-102.9) | 100.8 (98.1-104.0) |
| Prolonged CRT      | 2/8 (25%)   | 2/12 (16.6%)       | 5/22 (22.7%)    |
| Abnormal mucous membranes | 4/8 (50%)   | 1/12 (8.3%)        | 9/22 (40.9%)    |
| Abnormal fecal character | 2/8 (25%)   | 1/12 (8.3%)        | 5/22 (22.7%)    |
