Table Clinical signs of acute toxicity in animals treated with the same doses.

| Dose (mg/kg) (n= deaths/survivals) | AMD | AMD/HP-β-CD | Fc | F10 |
|------------------------------------|-----|-------------|----|-----|
| 175 mg/kg (n= 2/2)                |     |             |    |     |
| 275 mg/kg (n= 3/3)                |     |             |    |     |
| 440 mg/kg (n= 1/1)                |     |             |    |     |
| 690 mg/kg (n= 2/2)                |     |             |    |     |
| 1090 mg/kg (n= 3/4)               |     |             |    |     |
| 275 mg/kg (n= 0/2)                |     |             |    |     |
| 440 mg/kg (n= 1/2)                |     |             |    |     |
| 690 mg/kg (n= 2/3)                |     |             |    |     |
| 1090 mg/kg (n= 1/1)               |     |             |    |     |

| Clinical signs                   | AMD | AMD/HP-β-CD | Fc | F10 |
|----------------------------------|-----|-------------|----|-----|
