Enrollment

Assessed for eligibility (n=29)

- Excluded (n=0)
  - Not meeting inclusion criteria (n=)
  - Declined to participate (n=)
  - Other reasons (n=)

Randomized (n=29)

Allocation

- Allocated to intervention (eDST) (n=18)
  - Received allocated intervention (n=18)
  - Did not receive allocated intervention (give reasons) (n=0)

- Allocated to control (n=11)
  - Received allocated intervention (n=11)
  - Did not receive allocated intervention (give reasons) (n=0)

Follow-Up

- Lost to follow-up (give reasons) (n=0)
- Discontinued intervention (give reasons) (n=0)

Analysis

- Analysed (n=17)
  - Excluded from analysis (n=1)
    - Device malfunction

- Analysed (n=11)
  - Excluded from analysis (give reasons) (n=0)
| Item                  | Item no | CONSORT Description (Randomized, controlled trials)                                                                                           | Extension for Simulation-based Research                                                                 | Reported on Page # |
|----------------------|---------|---------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|-------------------|
| **Title and abstract** | 1a, 1b  | 1a: Identification as a randomized trial in the title  
1b: Structured summary of trial design, methods, results, and conclusions | In abstract or key terms the MESH or searchable keyword term must have the word “simulation” or “simulated”. | Pages 1/2         |
| **Introduction**      |         |                                                                                                                                             | Clarify whether simulation is subject of research or investigational method for research.                 | Pages 3/4         |
| **Methods**           |         |                                                                                                                                             |                                                                                                          |                   |
| Trial Design          | 3a, 3b  | 3a: Description of trial design (such as parallel, factorial) including allocation ratio  
3b: Important changes to methods after trial commencement (such as eligibility criteria), with reasons |                                                                                                          | Page 5            |
| Participants          | 4a, 4b  | 4a: Eligibility criteria for participants  
4b: Settings and locations where the data were collected                                            |                                                                                                          | Pages 5/6         |
| Interventions         | 5       | The interventions for each group with sufficient details to allow for replication, including how and when they were actually administered   | Describe the theoretical and/or conceptual rationale for the design of each intervention.  
Clearly describe all simulation-specific exposures, potential confounders, and effect modifiers. | Pages 5/6         |
| Outcomes              | 6a, 6b  | 6a: Completely defined pre-specified primary and secondary outcome measures, including how and when they were assessed  
6b: Any changes to trial outcomes after the trial commenced, with reasons | In describing the details of methods of assessment, include (when applicable) the setting, instrument, simulator type,  
timing in relation to the intervention, along with any methods used to enhance the quality of measurements.  
Provide evidence to support the validity and reliability of assessment tools in this context (if available). | Page 7            |
| Sample size / Study size | 7a, 7b | 7a: How sample size was determined  
7b: When applicable, explanation of any interim analyses and stopping guidelines |                                                                                                          | Page 5            |
| Randomization: Sequence generation | 8a, 8b | 8a: Method used to generate the random allocation sequence  
8b: Type of randomization; details of any restriction (such as blocking and block size) |                                                                                                          | Page 5            |
| Randomization: Allocation concealment mechanism | 9       | Mechanism used to implement the random allocation sequence (such as sequentially numbered containers), describing any steps taken to conceal the sequence until interventions were assigned |                                                                                                          | N/A               |
| Randomization: Implementation | 10     | Who generated the random allocation sequence, who enrolled participants, and who assigned participants to |                                                                                                          | Page 5            |
| Interventions                           | Description                                      | Page |
|----------------------------------------|--------------------------------------------------|------|
| Blinding (masking)                     | 11a: If done, who was blinded after assignments to interventions (for example, participants, care providers, those assessing outcomes) and how 11b: If relevant, description of the similarity of interventions. |      |
| Statistical Methods                    | 12a: Statistical methods used to compare groups for primary and secondary outcomes 12b: Methods for additional analyses, such as subgroup analyses and adjusted analyses. |      |
| Results                                | 13a: For each group, the numbers of participants who were randomly assigned, received intended treatment, and were analysed for the primary outcome 13b: For each group, losses and exclusions after randomization, together with reasons. |      |
| Recruitment                            | 14a: Dates defining the periods of recruitment and follow-up 14b: Why the trial ended or was stopped. |      |
| Baseline data                          | 15 A table showing baseline demographic and clinical characteristics of each group. |      |
| Numbers analyzed                       | 16 For each group, number of participants (denominator) included in each analysis and whether analysis was by original assigned groups. |      |
| Outcomes and estimation                | 17a: For each primary and secondary outcome, results for each group, and the estimated effect size and its precision (such as 95% confidence interval) 17b: For binary outcomes, presentation of both absolute and relative effect sizes is recommended. |      |
| Ancillary analyses                     | 18 Results of any other analyses performed, including subgroup analyses and adjusted analyses, distinguishing pre-specified from exploratory. |      |
| Adverse Events                         | 19 All important harms or unintended effects in each group (for specific guidance see CONSORT for harms). |      |
| Discussion                             | Specific discussion of the limitations of simulation-based research. |      |
| Generalizability                       | 21 Generalizability (external validity) of the trial findings. |      |

| Interpretation                         | Interpretation consistent with results, balancing benefits and harms, and considering other relevant evidence. | Page |
|----------------------------------------|-------------------------------------------------------------------------------------------------------|------|
| Other Information                      |------------------------------------------------------------------------------------------------------|------|
| Registration                           | 23 Registration number and name of trial registry. |      |
| Protocol                               | 24 Where the full trial protocol can be accessed, if available. |      |
| Funding                                | 25 Sources of funding and other support (such as supply of drugs), role of funders. List simulator brand and if conflict of interest for intellectual property exists. |      |

| Numbers analyzed                       | For each group, number of participants (denominator) included in each analysis and whether analysis was by original assigned groups. | Page |
| Outcomes and estimation                | For assessments involving more than one rater, inter-rater reliability should be reported. | Page |
| Ancillary analyses                     | Results of any other analyses performed, including subgroup analyses and adjusted analyses, distinguishing pre-specified from exploratory. | Page |
| Adverse Events                         | All important harms or unintended effects in each group (for specific guidance see CONSORT for harms). | Page |
| Discussion                             | Specific discussion of the limitations of simulation-based research. | Page |
| Generalizability                       | Generalizability (external validity) of the trial findings. | Page |
