# Table of Contents

**Volume 7  Number 12  December 2019**

### A New Numerical Method for DNA Sequence Analysis Based on 8-Dimensional Vector Representation
D. D. Zhang
Page 2941

### Influence of Low-Frequency Sonolysis on the Stability of Reactions Involving Associates
T. P. Kulagina, L. P. Smirnov, Z. S. Andrianova
Page 2950

### Output Characteristics of Narrow No-Gain Competition Linewidth Dual-Wavelength Laser at 912 nm and 1064 nm
Y. Liu, Y. Dong, W. C. Dai, Y. J. Yu, C. Wang, X. H. Zhang
Page 2959

### The Effect of Injected Energy on Low Energy Single Longitudinal Mode Pre-Lase Q-Switched Pr:YLF Laser
W. C. Dai, L. Jin, Y. Dong, X. H. Zhang, G. Y. Jin
Page 2968

### Simple Singular Perturbation Problems with Turning Points
N. Wang
Page 2979

### Investigations into Some Simple Expressions of the Gamma Function in Wind Power Theoretical Estimate by the Weibull Distribution
S. Touré
Page 2990

### Double Lipschitz Stability for Nonlinearly Perturbed Differential Systems with Multiple Delay
R. Huo, X. L. Wang
Page 3003

### A New Binomial Tree Method for European Options under the Jump Diffusion Model
L. K. Zhu, X. Kan, H. S. Shu, Z. F. Wang
Page 3012

### Extrapolation of Explicit DIMSIMs of High Order to Solve the Ordinary Differential Equations
A. J. Kadhim, A. Gorgey
Page 3022

### On Non Liénard Type with One Limit Cycle
A. E. M. Saed, A. B. Hamid
Page 3031

### Generalized Fibonacci Sequence: Possible Template for the Constants of Nature
S. Tosto
Page 3037
Type-2 Fuzzy Point
M. S. M. Hussan, M. A. K. Al-Khafaji........................................................................................................................................3067

Simulation of Gas-Liquid Mixture Movement through a Pipeline on the Seabed, Taking into Account the Heat Exchange Process
E. M. Abbasov, G. R. Agayeva, N. A. Agayeva, T. S. Kengerli..................................................................................................................3073

Nanostructured Anti-Reflection Coatings for Enhancing Transmission of Light
B. K. Mousavi, A. K. Mousavu, T. Busani, M. H. Zadeh, S. R. J. Brueck ..................................................................................................................................................3083

Exact Travelling Wave Solutions of Two Nonlinear Schrödinger Equations by Using Two Methods
Q. M. Zhang, M. Xiong, L. W. Chen..................................................................................................................................................3101

Generation of Quantum Vector States Using the Exchange Interaction
M. G. Majumdar..............................................................................................................................................................................3116

Algebraicity of Induced Riemannian Curvature Tensor on Lightlike Warped Product Manifolds
D. Ndayirukiye, G. Nibaruta, M. Karimumuryango, A. Nibirantiza.........................................................................................................3132

Loschmidt’s Paradox, Extended to CPT Symmetry, Bypasses Second Law
G. S. Levy......................................................................................................................................................................................3140
The Journal of Applied Mathematics and Physics (JAMP) is published monthly by Scientific Research Publishing, Inc., USA.

**Subscription rates:**
Print: $39 per issue.

**Disclaimer of liability**
Statements and opinions expressed in the articles and communications are those of the individual contributors and not the statements and opinion of Scientific Research Publishing, Inc. We assume no responsibility or liability for any damage or injury to persons or property arising out of the use of any materials, instructions, methods or ideas contained herein. We expressly disclaim any implied warranties of merchantability or fitness for a particular purpose. If expert assistance is required, the services of a competent professional person should be sought.

**Production Information**

For manuscripts that have been accepted for publication, please contact:
E-mail: jamp@scirp.org
Journal of Applied Mathematics and Physics is an international journal dedicated to the latest advancement of applied mathematics and physics. The goal of this journal is to provide a platform for researchers and scientists all over the world to promote, share, and discuss various new issues and developments in different areas of applied mathematics and physics. We aim to publish high quality research articles in terms of originality, depth and relevance of content, and particularly welcome contributions of interdisciplinary research on applied mathematics, physics and engineering.

**Subject Coverage**

The journal publishes original papers including but not limited to the following fields:

- Applications of Systems
- Applied Mathematics
- Applied Non-Linear Physics
- Applied Optics
- Applied Solid State Physics
- Biophysics
- Computational Physics
- Condensed Matter Physics
- Control Theory
- Cryptography
- Differentiable Dynamical Systems
- Engineering and Industrial Physics
- Experimental Mathematics
- Fluid Mechanics
- Fuzzy Optimization
- Geophysics
- Integrable Systems
- Laser Physics
- Methodological Advances
- Multi-Objective Optimization
- Nanoscale Physics
- Nonlinear Partial Differential Equations
- Non-Linear Physics
- Nuclear Physics
- Numerical Computation
- Optical Physics
- Portfolio Selection
- Riemannian Manifolds
- Scientific Computing
- Set-Valued Analysis
- Soliton Theory
- Space Physics
- Symbolic Computation
- Topological Dynamic Systems
- Variational Inequality
- Vector Optimization

We are also interested in: 1) Short reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book reviews—Comments and critiques.

**Notes for Intending Authors**

The journal publishes the highest quality original full articles, communications, notes, reviews, special issues and books, covering both the experimental and theoretical aspects including but not limited to the above materials, techniques and studies. Papers are acceptable provided they report important findings, novel insights or useful techniques within the scope of the journal. All manuscript must be prepared in English, and are subjected to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by prints in hard copy.

**Website and E-Mail**

https://www.scirp.org/journal/jamp  E-mail: jamp@scirp.org
What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
