### Supplementary file 3: Unadjusted cumulative mortality rates according to the type of mission (n = 8123)

| Mortality  | Air lifted patients (n = 3357, 42%) | Ground escorted patients (n = 166, 2%) | Assisted patients (n = 2001, 25%) | Aborted missions (n = 2599, 31%) |
|-----------|-----------------------------------|----------------------------------------|---------------------------------|-------------------------------|
| Day 1     | Cumulative mortality rate (95% CI) | 8.4% (7.5-9.4)                         | 15.1% (10.4-21.5)               | 28.8% (26.9-30.9)             | 14.7% (13.4-16.1)             |
| Day 30    | Cumulative mortality rate (95% CI) | 16.3% (15.1-17.6)                      | 27.1% (21.0-34.6)               | 31% (29.0-33.1)               | 17.0% (15.6-18.5)             |
| Day 365   | Cumulative mortality rate (95% CI) | 19.7% (18.4-21.1)                      | 33.2% (26.6-40.9)               | 34.4% (32.4-36.6)             | 20.9% (19.4-22.6)             |
