ABSTRACT

This paper aims to publish three fragments preserved in the archaeological store at Atfiyah and belong to three mastaba tombs at Giza; two of them were mostly collapsed. The importance of this paper is due to that two fragments of those in question only contain the names of their owners [the second and the third fragments], while the first one bears some titles without its owner name. Although two fragments bear the names of their owners, these names were frequently repeated in the Old Kingdom which makes it more difficult to determine their identity. So, identifying the persons who held these names is also the aim of this paper. Accordingly, this paper tries to find out the owners of those fragments and their tombs. After examining the names and the titles inscribed on these fragments and after reconstructing and supplementing the texts of the first fragment, the study concluded that the first fragment belongs to $Ks(ej)-hr-Pth:Fit-t$ of the Six$^{th}$ Dynasty, and the owner of the mastaba tomb G 7652 in Giza, while the second fragment is one of the two stelae of $\ddot{\nu}nh \ \dot{S}pss-k3f$ of the Fif$^{th}$ Dynasty, and the owner of the mastaba tomb G 6040 in Giza. The third fragment is a lintel of $Ht-p-hr-nfr$, the wife of $Prj-sn$ who lived during the middle of the Fif$^{th}$ Dynasty and the beginning of the Six$^{th}$ Dynasty. This fragment may have been a part of his mastaba tomb LD 78 in Giza.

KEYWORDS: Giza; Mastaba, Old Kingdom, Stela; $Ks(ej)-hr-Pth:Fit-t$, $\ddot{\nu}nh \ \dot{S}pss-k3f$, $Ht-p-hr-nfr$.

I- INTRODUCTION
Since many monumental objects are crammed in stores of archaeological sites in Egypt and have not yet been published, their scientific publication will benefit the field of Egyptology and Egyptologists alike. These objects, mostly engraved by sunk or raised hieroglyphic inscriptions and reliefs, will add value to Egyptology. So, the publication of the following three fragmentary reliefs is of similar value for the field, while also having unique importance that stems from the fact that two of these fragments belong to two mastabas tombs which were mostly collapsed, where the third one is a round top-stela, out of a pair, that was moved into the archaeological site of Atfiyah with no further evidence about the current state or location of the pairing stela.

These fragmentary reliefs, being preserved in the storeroom of Atfiyah’s archaeological site at Giza [known by inspectors as the storeroom of ‘Ali El-Khouli], hold the record numbers 1658-1646 and 1638. Unfortunately, the record register of this storage mentions neither the dating nor any information about the owners of these fragments. However, since some internal attestations refer to Giza as a provenance of these fragments, this paper aims to publish them and to determine the identity of their owners.

II- THE FIRST FRAGMENT
[THE FRAGMENTARY LINTEL OF Ks(zj)-h-Ph(Ft-k-tz)].

1- Description [FIGURES 1-2]
The first fragment is made of limestone. It is a part of a lintel, measuring 50 cm in height and 45 cm in width. It bears the register number 1658, and exhibits an irregular shape inscribed by incised hieroglyphic inscriptions in three partially-erased horizontal lines read from right to left as follows:

```
//////// lnt.t zsb //////////
////////// njw.wt n(jj).t Izzj //////////
jmj-j-rs ////////// ////////// z8(.w)
```

2- Text Reconstruction and Translation
Despite difficulties in translation that arise from the missing words in these lines, it is not impossible to give an accurate translation Pl. 1, [FIGURE 1]

The first line begins with the mono-consonant sign $t$, and is followed by the tri-consonant sign $hn.t$ $^1$ supplemented with the two mono-consonants $t$ one above

$^1$ Gardiner 1957: S.L. W18.
the other. The last sign in this line is the tri-consonant sign-\[\text{\textipa{zb}}\] which completes the reading of this line as \[\text{\textipa{lnt.t zsb}}\]. After examining the titles of the Old Kingdom, no title could be read as \[\text{\textipa{lnt.t zsb}}\], and thus, \[\text{\textipa{t}}\] and \[\text{\textipa{lnt.t}}\] should be components of one title, while the sign-\[\text{\textipa{zb}}\] is a part of another one. To provide a complete reading and an accurate translation for this line, the readings of the second and third lines are needed. Consequently, the translation for this line is provided later in the paper.

The second line, on the other hand, is the clearest and can be immediately read as \[\text{\textipa{njw.(w)t msw.t n(jj).t lzzj}}\]. Undoubtedly, this phrase is a part of a title that should be reconstructed as \[\text{\textipa{jmmj-rs njww.t msw.t n(jj).t Nfr-lzzj}}\] [overseer of the new settlements of the pyramid Perfet is \[\text{\textipa{lzzj}}\]]. After examining the names of the Old Kingdom officials who bore this title, it was held by \[\text{\textipa{Ks(zj)-hr-Pth}}\] whose beautiful name is \[\text{\textipa{Ftk-tS}}\] of the Six\textsuperscript{th} Dynasty and the owner of the tomb \textit{mastaba} G5560[LD 35] at Giza\textsuperscript{5}.

The third line begins with the two mono-consonants \[\text{\textipa{m}}\], reading of \[\text{\textipa{jmmj-rs}}\], and ends with the bi-consonant \[\text{\textipa{zS}}\]. It could be also somewhat identifying the sign-\[\text{\textipa{hd}}\] and the sign-\[\text{\textipa{jnb}}\] following \[\text{\textipa{jmmj-rs}}\] as well as the sign-\[\text{\textipa{hrp}}\] before the word \[\text{\textipa{zS}}\]. Therefore, both \[\text{\textipa{hd}}\] and \[\text{\textipa{jnb}}\] are parts of different two titles which can be reconstructed as \[\text{\textipa{jmmj-rs jnbw hd}}\] [Overseer of the Memphite Nomes]\textsuperscript{10} and \[\text{\textipa{hrp zS(w)t}}\] [director of scribes]\textsuperscript{12}; the two titles are also held by \[\text{\textipa{Ks(zj)-hr-Pth:Ftk-tS}}\]\textsuperscript{13}. Furthermore, there is a missing part between the sign-\[\text{\textipa{hd}}\] and the sign-\[\text{\textipa{jnb}}\] that can be, after studying the titles of \[\text{\textipa{Ks(zj)-hr-Pth:Ftk-tS}}\], supplemented with the ideogram \[\text{\textipa{Ḥm}}\] which has many supposed readings as \[\text{\textipa{Ḥm/Tp-ḥps(?)}}\], \[\text{\textipa{jwr}}\], \[\text{\textipa{Ḥm/Dsw.t}}\]. However, the precise reading is unknown.

\textsuperscript{17}For the reading \textit{Ḥm/Dsw.t}, See GRDSELOFF 1942: 212.
Accordingly, this title [overseer of the Memphite and Letopolite Nomes] can be read as jmjj-rs jnb hd [overseer of the Memphite and Letopolite Nomes]. After comparing the titles of K3(sj)-hr-Pth:Fk-t3 that were published by Junker with the titles on our current fragment, the titles in the first line can be reconstructed as n(jj) ns.t hnt.t [he who belongs to the foremost seat] who related to the highest official residence, and zsb `d mr [judge and administrator] or zsb jmjj-rs zš(.w) [judge and the overseer of scribes]. The two titles zsb and jmjj-rs are most likely since the remains of the mono- consonant r [with the front part of the owl’s claw above it] can be seen to the side of the sign in the upper left-hand corner. The whole text can be reconstructed, supplemented, and translated as follows:

- He who belongs to the foremost seat, the judge, and the overseer of scribes.
- overseer of the new settlements of the pyramid Perfet is Izzj.
- overseer of the Memphite and Letopolite Nomes, and the director of scribes.

This reconstruction and supplementation are confirmed by a further inscription on a lintel fragment that was reused in mastaba G 7652 in the eastern cemetery at Giza and found by Reisner. This inscription has been reconstructed by Fischer in a similar manner, with some different, to what was done in the fragment in question.

3- The Names, the Titles, and the Tomb of $Ks(\text{s}j)-hr-\text{PtH}$

The name of $Ks(\text{s}j)-hr-\text{PtH}$ is listed in both Ranke PN\textsuperscript{27} and Scheele-Schweitzer\textsuperscript{28}. It was common in the Old Kingdom\textsuperscript{29} and it can be translated as «My $k$s is with the god Ptah»\textsuperscript{30}. The nickname of $Ks(\text{s}j)-hr-\text{PtH}$ or his beautiful name\textsuperscript{31} is $Ftk-ts$ that was common in the Old Kingdom as a person’s name or a nickname\textsuperscript{32}. This name is translated by Scheele-Schweitzer as «……..das Brot», without translation its first component $Ftk$\textsuperscript{33}. This name is called on a divine being or minor deity in the Pyramid Texts who is described as $wdpw \,(n\j) \,R^w$ (Butler/cupbearer of the god Re)\textsuperscript{34}. Amer\textsuperscript{35} has discussed the opinions concerning the translation of the name of this deity in the Pyramid Texts and he has argued that this name should be rendered as (Presenter of the bread).

It is clear that $Ks(\text{s}j)-hr-\text{PtH}:Ftk-ts$ is a high-ranking official in the Old Kingdom, indicated by the titles he held. He bore some judicial offices as represented in the title $zsb$ and perhaps the title $n(jj) \,nst \,hnTT$. Strudwick suggests that the association between $n(jj) \,nst \,hnTT$ and the titles $zsb$ and $zsb \,'d\,-\,mr$ gives a sense of a legal nature for the title $n(jj) \,nst \,hnTT$\textsuperscript{36}. Moreover, the title $n(jj) \,nst \,hnTT$ confirms his position in the royal palace and his closeness to the king tile. In addition to being the overseer of the settlements [villages and domains]\textsuperscript{37} of the pyramid complex of king $Izzj$ that gives him the right to supervise all the endowments of the pyramid complex of this king, $Ks(\text{s}j)-hr-\text{PtH}:Ftk-ts$ is

\textsuperscript{27} Ranke 1935: 340 [21].

\textsuperscript{30} Ranke 1935: 340 [21]; Scheele-Schweitzer 2014: 708 [3505].
\textsuperscript{31} Junker 1914: Abb. 51; Ranke 1935: 143 [2]; Scheele-Schweitzer 2014: 366 [1175].
\textsuperscript{32} Ranke 1935: 142 [26]. LD 2: 96; Junker 1914: Abb. 51; Fischer 1976: PL. V; Mousa & Altenmüller 1977: Taf. 8, 34; Barta 2001: Fig. 3.20.
\textsuperscript{33} Scheele-Schweitzer 2014: 366 [1174].
\textsuperscript{34} Pyr: 120A-D, 123 G, 545C.
\textsuperscript{35} Amer 2020: 166-167.
\textsuperscript{36} Strudwick 1985: 178-181.
\textsuperscript{37} Altenmüller 2002: 25F.
also the overseer of the Memphite\textsuperscript{38} and Letopolite Nomess\textsuperscript{39}, the first and second Nomess of lower Egypt\textsuperscript{40}. Obviously, the two titles ‘\textit{d}‐\textit{mr jnb}\textsubscript{HD} and ‘\textit{d}‐\textit{mr} as governors of the Memphite and Letopolite Nomess are lower rank of that of \textit{Ks(\textit{ej})‐hr‐Pt\textsubscript{h} Fik‐ts} as the overseer of these two Nomess. The official rank of \textit{Ks(\textit{ej})‐hr‐Pt\textsubscript{h} Fik‐ts} is higher than a governor of these two Nome, rather, he is their supreme supervisor. On the other hand, another text inscribed on a similar fragment belongs to \textit{Ks(\textit{ej})‐hr‐Pt\textsubscript{h} Fik‐ts} had been reconstructed by Junker that displays on its first line the title of \textit{Ks(\textit{ej})‐hr‐Pt\textsubscript{h}} as ‘\textit{d}‐\textit{mr jnb‐hd} \textsuperscript{41} [governor of the Memphite and Letopolite Nomess]\textsuperscript{42}. If this reconstruction is correct, both the two titles ‘\textit{d}‐\textit{mr jnb‐hd} and \textit{jmjj‐rs inb hd} \textsuperscript{43} indicate to \textit{Ks(\textit{ej})‐hr‐Pt\textsubscript{h}} official hierarchy. The latter title is undoubtedly the end of his tenure.

\end{figure}

The tomb of \textit{Ks(\textit{ej})‐hr‐Pt\textsubscript{h} Fik‐ts} is located in the western cemetery at Giza, near the temenos wall of the pyramid of Khufu [G 5560= LD 35]\textsuperscript{43}. Bear dates this mastaba to the end of the reign of King Pepi II\textsuperscript{44}, while Strudwick dates it from early to the middle of the Sixth Dynasty\textsuperscript{45}. According to Harpur, it is dated between the reign of King Teti and the reign of King Pepi I\textsuperscript{46}. Most of this tomb has been collapsed, leaving just the lower parts of the false doors and a few blocks intact\textsuperscript{47}. Most probably, the fragment in question is one of these blocks.

III- THE SECOND FRAGMENT (THE STELA OF ‘nh ṣpsss-k3w).  

1- Description [FIGURES 3-4]

The second fragment is a small and thin flat stela with a curved top. It is made of limestone, measuring 59 cm in height and 37 cm in width. It bears the register Nº. 1646. It is inscribed with sunken hieroglyphic inscriptions in three small horizontal lines, each one contains only one or three words. This short hieroglyphic text gives the title and the name of its owner whose name ‘nh ṣpsss-k3w, the overseer of the house.

2- Text Translation

The stela is inscribed by three small horizontal lines read from right to left as follows:

jmījj-r3 ṭnh ṣpsss-k3w

The overseer of the house ‘nh ṣpsss-k3w

3- The Name, the Title, and the Tomb of ‘nh ṣpsss-k3w

The name of ‘nh ṣpsss-k3w is listed in both Ranke and Scheele-Schweitzer PN. It was common in the Old Kingdom, and it means «May ṣpsss-k3w live». Scheele-Schweitzer inventoried all the persons who bear this name and after investigating their titles, it is concluded that this stela belongs to ‘nh ṣpsss-k3w the owner of the nucleus mastaba G 6040 [LD 18], which is housed in the west cemetery at Giza and dated to the Fifth Dynasty. The texts of this tomb mention only the htp rdj.w njsw.t formula and the title of ‘nh ṣpsss-k3w as the overseer of the house of the king i.e. Nfr-jr-k3-R. Unfortunately, no more data can be found in his tomb.

48 For the rounded-top stela, See MüLLER 1933: 165-206; PfLÜGER 1947: 127-135; Vandier 1954: 477, FIG. 293; 485, FIG. 295; Westendorf 1966: 40ff, 74ff; Hölzl 1992: 285; Karl-Martin 1986: 1-6; Hölzl 2001: 320; Shaw & Nicholson 2002: 278.
49 Ranke 1935: 417 [7]; Scheele-Schweitzer 2014: 305-306 [750].
50 Scheele-Schweitzer 2014: 305-306 [750].
51 For instance, ‘nh ṣpsss-k3w of the Fifth Dynasty, and the owner of the mastaba G 1008 at Giza who is titled as nḥt hrw zsb (Strong of voice and Judge). Reiser & Fisher 1914: 244; Reiser 1942: 252 [12]; PM 3: 52. ‘nh ṣpsss-k3w of the end of the Fifth Dynasty and the owner of the mastaba Nº.9 at Giza. He is titled as jmījj-r3 pr [Steward of the house] jmījj-r3 ḫm.w k3 (Overseer of ka-servants). Hassan 1950, 83; PM 3: 245. ‘nh ṣpsss-k3w who bears the titles jmījj-r3 ḫm k3 [Overseer of Ka-servant], shd ḫm-k3 [the inspector of the Ka-servants], and ḫm-ntr H3f R [Priest of Khafren] Hassan 1932: PL. XXIX; Hassan 1936, FIGS. 22, 25, 27. He was living in the end of the Fifth Dynasty to the middle of Sixth Dynasty. Hassan 1932: 15; PM 3: 272. He may be the son of K3-nswt. Hassan 1936: 75, FIG. 87; Weeks 1994: FIGS. 31-32, 25.
52 Weeks 1994: 85ff, FIGS. 53-54.
53 Reiser 1942: 217 [26]; PM 3: 175.
54 Reiser 1937: 30.
As mentioned on this stela, ‘nh /tcp-k3f bears the title jm[jj-r3 pr, which is rendered as [administrator/steward/overseer of the house/estate]55. According to Strudwick, this title may relate to some form of non-royal work and probably had a separate existence56. The holder of this title is the administrator of the estate of the king or his funerary temple endowments57. In the Old Kingdom, the title jm[jj-r3 pr was not restricted to overseeing the estate of the king, but it also associated with managing many different institutions58. Furthermore, this title continued and its highest rank jm[jj-r pr wr in the Middle Kingdom59, the New Kingdom60, and the Late Period61, either in its simple form jm[jj-r pr or associating with several institutions62.

According to the brief study of Reisner about the tomb of ‘nh /tcp-k3f in 193763, this stela is one of two rounded-top stelae that were set at the entrance of a sloping ramp [which leads up to this mastaba] and used for the burial procession64. Reisner was the first to mention these two stelae, which were found, at that time, in situ on either side of the mastaba65. Unfortunately, these two stelae were extracted from their position with no evidence whether the other stela was preserved in the storeroom of Atfıyah’s archaeological site or a further store. These two stelae were a part of the mastaba structure, and they may have been used for the funeral procession66. Since the inscriptions on both stelae face to the right, this stela in question is the right one. In a personal communication with Ramadan Hussein, he informed me about his forthcoming publication of mastabas at the Abu Bakr Cemetery at Giza. They have similar ramps, which are in fact a common feature of Giza mastabas. They are located at the back of these mastabas leading up to the burial shaft. He goes on to mention that Reisner found deposits of pottery at the end of such ramps and around the mouth of the burial shafts. Hussein draws the connection between these ramps and pottery deposits on one hand, and the textual reference for the performance of a prt-hrw n.f hr krr.t.f m pr dt [invocation of offerings on top of his shaft in the house of eternity]67. Perhaps this

IV- THE THIRD FRAGMENT
[The Fragmentary Architrave of Htp-hr-nfr.t].

1- Description [FIGURES 5-6].

The third fragment is a block made of limestone, measuring 12 cm in height and 38 cm in width, and bears the record number 1638. It exhibits a rectangular shape, most likely an architrave with remains of the offering formula *hṭp rdj.w njsw.t*.\(^{68}\)

2- Text Translation

This architrave is inscribed with sunk hieroglyphic inscription in a horizontal line that read from right to left as follows:

\[
\begin{array}{c}
krs.t \ m \ zm.t \ jmnt.t \ (nj.t) \ rh.t \ nj(j)sw.t \ Htp-hr-nfr.t
\end{array}
\]

A burial in the western necropolis (for) the acquaintance royal *Htp-hr-nfr.t.*

This hieroglyphic line is a part of *hṭp-rdjw njsw.t*\(^{69}\) formula that grants *Htp-hr-nfr.t* a burial in the western necropolis as a haven for an eternal afterlife. The lost part of this

---

\(^{68}\) For this formula, See WAINWRIGHT 1904: 101-104; HALL 1908: 5-7; GARDINER 1915: 79-93; BENNETT 1941: 77-82; BARTA 1963: 65-67; BARTA 1968; LAPP 1986: 172; BARTA 1987: 7-9; LEPROHON 1990: 163; SATZINGER 1997: 177-188; FRANKE 2003: 39-57; ILIN-TOMICH 2011: 20-34.

\(^{69}\)HASSAN 1936: FIG. 63; DUNHAM & SIMPSON 1974: FIG. 6; WEEKS 1994: FIG. 53; FISCHER 2000: 5, FIG. 2; vol.6, PL. XXXII.

FIG. 3; BOLSHAKOV 2005: 161, FIG. 11.1, PL. XXXII.
The name of Htp-hr-nfr.t is listed in both Ranke PN\textsuperscript{76} and Scheele-Schweitzer\textsuperscript{77}. It appeared in the Old Kingdom four times from the Fourth Dynasty to the Sixth Dynasty on the false door stela of Nfr-nfr\textsuperscript{78} [Cairo JE. 3520479], in the tomb of Prj-snb [LD 78] [G7901] at Giza\textsuperscript{80}, and on our current fragment. Apparently, the last two examples belong to Htp-hr-nfr.t in question. She is the wife of a person called Prj-snb\textsuperscript{81}, the owner of the mastaba [LD 78] at the eastern cemetery of Giza who lived during the middle of the Fifth Dynasty and the beginning of the Sixth Dynasty\textsuperscript{82}. Most probably, this fragment was an architectural part of his mastaba tomb LD 78 [G 7901] in Giza\textsuperscript{83}.

The honorific title $\text{rx.t n(j)sw.t}$ first appeared in the Fourth Dynasty\textsuperscript{84}. Its orthographical form $\text{rh.t n(j)sw.t}$ is used for a man and a woman alike\textsuperscript{85}. Beside its common reading and translation, it has been read by some Egyptologists as $\text{jṛ(j) jḥ(t) nswt}$ [He belonging to the king]\textsuperscript{86} or $(j)r(j) \text{ḥ}(j) n(j)\text{-sw.t}$ [He belonging to the baby king]\textsuperscript{87}.

V- CONCLUSION

The importance of this article lies in the publication of three fragments of three persons whose tombs have been scattered by small stones and short texts. This helps the editors of the dictionaries of Ancient Egyptians Names and Titles, as well as the Catalogs of Monuments, in listing these pieces with sufficient knowledge that helps the scholars. The first fragment of $Ks(ej)\cdot hr\cdot Pth:Ftk-ts$ demonstrates his high ranking status in the end of the Fifth Dynasty to the middle of the Sixth Dynasty as the overseer of the Nomes of Memphis and Letopolis, as well as the overseer of the new settlements of the pyramid King Izzj. Also, it indicates to his juridical offices and his position in the royal palace. Similarly, the title of ‘nh $Spss-kzsf$ proves his rank as the overseer of the house of the king $Nfr-jr-k3-Rc$. This title refers to his office as responsible for the estate of the king. In addition, his stela in question and his missed one reveals that the mastabas in this period had a ramp and probably two stelae led to the top of the burial shaft. They were used for the burial procession and the offering ritual $prt-hrw\ n.f\ hr\ krtt.f$ [invocation of offerings on top of his shaft]. Finally, the fragmentary object of $Htp-hr-nfr.t$ may be a part of the mastaba tomb of her husband $Prj-snb$.

ACKNOWLEDGMENT

I would like to thank Dr. Rabiaa Radi for providing me with the photos of these objects and for restoring and cleaning them that made their texts and inscriptions clearer.

THREE OLD KINGDOM FRAGMENTARY RELIEFS AND THEIR OWNERS

ثلاثة بقايا لقطع منقوشة من الدولة القديمة ومالكيها

د. إبراهيم عبد الستار إبراهيم و أ/ شويكار سلامة
قسم التاريخ- كلية الآداب- جامعة الإمام عبد الرحمن بن فيصل

الملخص

تهدف تلك الورقة البحثية إلى نشر ثلاثة قطع محفوظة بمخزن الآثار في أطفيح، وتتلمي إلى بقايا ثلاثة مقابر تهدمت معظم أجزائها. وتكمن أهمية تلك الورقة البحثية في التعرف على أسماء أصحاب تلك القطع الثلاثة؛ حيث إن قطعتين فقط من تلك القطع الثلاثة تحمل أسماء مالكيها (القطعتين الثانية والثالثة)، بينما القطعة الأولى تحمل بقايا ألقاب بدون أي اسم يدل على صاحب تلك القطعة. وتزداد المشكلة أن تلك الأسماء تكرر ظهورها كثيرًا في الدولة القديمة. وبعد فحص الألقاب والأسماء التي وردت على تلك القطع وإعادة تركيب واستكمال النصوص التي وردت على القطعة الأولى، فقد انتهت تلك الدراسة إلى أن القطعة الأولى تخص المدعو "كا خر بتاح فتك تا" من الأسرة السادسة، وصاحب المقبرة G 7652 بالجيزة، بينما القطعة G الثانية هي لوحة مستديرة القمة من إحدى لوحتين لشخص يدعى "عنخ شيسكاف" من الأسرة الخامسة، وصاحب المقبرة 6040 بالجيزة، أما القطعة الثالثة فهي عبارة عن جزء من عتب يحمل اسم السيدة "حتب حر نفرت" زوجة المدعو "برى سن" الذي ربما عاش في الفترة ما بين منتصف الأسرة الخامسة وحتى بداية الأسرة السادسة وربما كانت تلك القطعة هي جزء من مقتبسته في الجيزة رقم LD 78.

الكلمات الدالة: الجيزة، حتب حر نفرت، الدولة القديمة، عنخ شيسكاف، كا خر بناج، لوحة، مصطبة.
