Comment on essd-2021-401
Nicolas Heijmans

Community comment on "Historical and future weather data for dynamic building simulations in Belgium using the regional climate model MAR: typical and extreme meteorological year and heatwaves" by Sébastien Doutreloup et al., Earth Syst. Sci. Data Discuss., https://doi.org/10.5194/essd-2021-401-CC2, 2022

By the way, publishing all years would be useful for other application. For instance, for water management, we don't need a typical year but a series of 20 years.
