Supplemental Table 1. Complications, length of stay, mortality, and discharge disposition in patients transported on venovenous extracorporeal oxygenation based on mode of transportation.

| Characteristic                  | Ground Transport n=35 | Air Transport n=23 | p-value |
|--------------------------------|-----------------------|--------------------|---------|
| Cardiac Complications, n (%)   | 14 (40%)              | 10 (43%)           | **      |
| Respiratory Complications, n (%)| 8 (23%)               | 9 (39%)            | **      |
| Thrombosis, n (%)              | 7 (20%)               | 7 (30%)            | **      |
| Bleeding, n (%)                | 15 (43%)              | 13 (57%)           | **      |
| Shock Liver, n (%)             | 2 (6%)                | 0 (0%)             | **      |
| Hemorrhagic Stroke, n (%)      | 9 (26%)               | 4 (17%)            | **      |
| Equipment Complications, n (%) |                      |                    |         |
| Oxygenator Failure             | 5 (15%)               | 1 (4%)             | **      |
| Circuit Change                 | 9 (26%)               | 5 (22%)            | **      |
| Cannula Problems               | 20 (57%)              | 9 (39%)            | **      |
| Circuit Clot                   | 9 (26%)               | 5 (22%)            | **      |
| Hemofilter Failure             | 0 (0%)                | 0 (0%)             | **      |
| Pump Failure                   | 0 (0%)                | 0 (0%)             | **      |
| Air in Circuit                 | 0 (0%)                | 0 (0%)             | **      |
| In-Hospital Mortality, n (%)   | 16 (46%)              | 6 (26%)            | **      |
| Time on ECMO (days), median (IQR) | 9 (5-18)         | 8 (4-20)           | 0.79    |
| ICU LOS (days), median (IQR)   | 16 (8-35)             | 22 (11-41)         | 0.24    |
| Hospital LOS (days), median (IQR) | 21 (8-37)       | 23 (17-43)         | 0.31    |
| Discharge Disposition, n (%)   |                      |                    | 0.24    |
| Home                           | 5 (14%)               | 2 (9%)             |         |
| Another Hospital               | 2 (6%)                | 4 (17%)            |         |
| TCU/Rehab                      | 12 (34%)              | 11 (48%)           |         |
| Deceased                       | 16 (46%)              | 6 (26%)            |         |

Abbreviations: IQR=interquartile range, ICU=intensive care unit, LOS=length of stay, TCU=transitional care unit.
* indicates p<0.05.
** indicates that p-value is not listed due to having risk adjusted odds ratio.
