Clinical Infectious Diseases, one of the most heavily cited journals in the fields of infectious diseases and microbiology, publishes articles on diverse topics in infectious diseases, with a focus on clinical practice.

Published on behalf of the Infectious Diseases Society of America, every issue of CID includes special sections focusing on key topics such as HIV/AIDS, antimicrobial resistance, aging and infectious diseases, and biological weapons. Many articles are published with commentaries by prominent researchers, and current trends and best practices are regularly covered in review articles and practice guidelines. CID also publishes numerous supplements devoted to single topics in the field.

Impact Factor: 9.117
ISI JCR Ranking: 3/88 (INFECTIOUS DISEASES), 11/155 (IMMUNOLOGY), 11/125 (MICROBIOLOGY)
