Study population
All men (1994)
(n= 12,805)

Final study population
(n= 12,271)

Excluded:
• Missing blood pressure n= 24
• Any cancer before entry n= 382
• Observation time < 1 year n= 128

Prostate cancer cases
(n= 811)

Non cases
(n= 11,460)

Alive without recurrence
(n= 289)
Palliative treatment or recurrence after curative treatment
(n= 104)
Dead
(n= 265)

Missing treatment/follow-up data
(n= 153)
