| Asian or Asian American                                                          | Asian-American, Southeast Asians, Asians, Japanese, East Asian, South Asian, Indians, Thais, “Philipinos”, Vietnamese, Chinese, Korean, Karen, Filipino, East and South Asian American, Chinese Han, Japanese American, Taiwanese, Malaysian, Laotian, Pakistani, North Asian, North East Asian |
| Black or African American                                                         | African American, African, Sub-Saharan, African, Non-Hispanic Black, Black, Black South or Central American, Black Caribbean, Black African, Afro-Caribbean, African Caribbean, Black Americans |
| Hispanic or Latino                                                                | Hispanic, Hispanic American, Latino, Latinx, Latino-American, Caucasian/Hispanic, Latina, Latin American, Mexican American, Hispanic or Latino, Brown, Spanish |
| Native Hawaiian or Pacific Islander                                               | Hawaiian or Pacific Islander, Pacific Islander, Aboriginal Australians, New Guineans                                                            |
| White                                                                            | Mediterranean, European, Ashkenazi Jewish, European American, White, Non-Hispanic White, Caucasian, Northern European, Greeks, Cypriots, Turks, Sardinians, White European, Middle Eastern or North African, Western, Middle Eastern, Caucasian/Hispanic, Scandinavian, Celtic, Nova Scotia, English, French, German, Canadian, Egyptian |
**eTable 2. Context, Description, and Representative Examples of Mentions of Race and Ethnicity**

| Context of Mention                  | Description                                                                 | Representative Examples                                                                 |
|-------------------------------------|-----------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|
| Prevalence or epidemiological data  | Table, graph, or statements that illustrate proportion of individuals with a particular condition | Table outlining the prevalence of psoriasis in different racial and ethnic groups        |
| Risk factor                         | Explicitly or implicitly describing race and ethnicity as a factor that increases the probability of an adverse event or condition | Listing race and ethnicity of African Americans, Hispanic Americans, Native Americans, Asian Americans, and Pacific Islanders as a major risk factor for Type 2 Diabetes |
| Patient case or as an example       | Clinical scenarios involving specific person(s) and or their family members  | Case of a 23-year-old female with Family History of “Indian” in case discussing thalassemia |
| Historical or background information| Information that is historical in nature without reference to internal biological factors | Descriptions of how “Spanish colonists” in 17\textsuperscript{th} century observed “Peruvian Indians using the bark of the cinchona tree to treat malaria” |
| Diagnostic or treatment factor      | Listing a particular race and ethnicity as a criterion for making a diagnosis, treatment decisions, or clinical management | Mentioning that African American patients are “most responsive” to thiazide diuretics without any further explanation |
| Anthropomorphic explanation        | Quantitative or qualitative assessment of a race and ethnic group using physical body measurements such as size/content of muscle and fat | Stating that “Asian populations expand subcutaneous fat less and have visceral fat at lower Body Mass Index (BMI)” |
| Other                               | Mentions that did not fit in the main contexts above                         | Mentions of racial correction in electrocardiogram screening criteria, elimination of race consideration in estimated glomerular filtration rate, blood pressure reduction through Black barbershops |
