CORRIGENDUM

TACC3 mediates the association of MBD2 with histone acetyltransferases and relieves transcriptional repression of methylated promoters

Tiziana Angrisano, Francesca Lembo, Raffaela Pero, Francesco Natale, Alfredo Fusco, Vittorio E. Avvedimento, Carmelo B. Bruni and Lorenzo Chiarotti

Nucleic Acids Res. 2006; 34, 364–372. doi:10.1093/nar/gkj400

The authors wish to apologize for errors in Figure 2A and B.

Figure 2A and B is a composite image constructed from multiple repeated experimental runs. This was not properly described in the figure captions. A new Figure 2A made of the unaltered original image is included in this corrigendum. A new composite Figure 2B is also included, showing clearly that the lanes come from different experiments.

The authors wish to apologize to the readers and publisher for the inconvenience caused.
