Abstract—Vitex negundo belongs to the family verbenaceae, is a aromatic shrub. This plant is commonly used for traditional medicines to treat various diseases. All parts include leaves, root, bark, seeds and flowers are used to treat diseases. It contains phytochemicals as secondary metabolites compare to other parts leaves contain number of phytochemicals these play a vital role in traditional medicines. Plant extracts of Vitex negundo possess different activities like anti-microbial, anti-inflammatory, anti-oxidant, anti-pyretic and others. It is also used as a larvical, mosquito repellent and insecticidal. This review aims to presenting the role of phytochemicals and its therapeutic uses to develop the modern medicine.

Keywords—Vitex negundo, Verbenaceae, Traditional medicine, Phytochemicals

I. INTRODUCTION

Vitex negundo linn is a aromatic shrub, is commonly called as nirgundi or nochi is found throughout the India is commonly grows in waste lands [1]. Its leaves, barks, roots, fruits and flowers are used as medicinal purposes in all over the India [2]. Phytochemical analysis of Vitex negundo confirms the presence of Trepeneoids, Flavonoids, Steroids, Anthroquione,Glycosides, Sugars, Alkaloid, Quinones, Phenols,Tannins, Saponins, Coumarin. [3]. It has a various medicinal properties particularly in the treatment of anti-arthritic, fungal diseases, antioxidant and other activities [4].

II. PLANT DESCRIPTION

Vitex negundo is a woody, and large shrubs or small trees up to 2.5- 4.5m high, with quadrangular branches. The plant has pungent, bitter, acrid taste. Leaves are 3-5 penta foliate and the leaflets are arranged palmately and terminal leaflets are long (5-10 cm) acute with petiolate (1-1.3 long), hairy beneath and both the ends are pointed. Flowers are in pedunculate branched tomentose cymes, which are bluish purple in colour and the fruits are round, succulent and black on ripening with four seeds. [5]

a) Geographical indication:

Vitex negundo is distributed throughout the India; altitude of 1500 m in the outer Himalayas It is grown commercially as a crop in parts of Asia, Europe, North America and West Indies. [5]

b) Classification:

Kingdom - Plantae
Subkingdom - Tracheobionta
Super division - Spermatophyte
Division - Magnoliophyta
Class - Magnoliopsida
Subclass - Asteridae
Order - Lamiales
Family - Verbenaceae
Genus - Vitex
Species - Negundo

III. ACTIVITIES

a) Antimicrobial activity:

Microbes are present everywhere which causes infectious diseases to humans in world wide. Vitex negundo Linn acts on both gram positive and gram negative organism. The plant extract acts as a antimicrobial agent. [6]

b) Anti-inflammatory activity:

Anti inflammatory property is to treat inflammation. The anti-inflammatory property of Vitex negundo is confirmed by clinical trials on rat. The leaf extract of Vitex negundo prevents carrageenan-induced rat paw edema and formaldehyde-induced rat paw edema. [1]

c) Antipyretic activity:

Pyrexia or fever is caused by secondary impact of infection, graft rejection and other diseased states. Antipyretic are used to reduce the body temperature. The presence of flavonoids in the Vitex negundo is responsible for the antipyretic activity. The antipyretic property of Vitex negundo shows the good result in albino rats induced yeast hyper pyrexia and it was compared to standard drug paracetamol. [7]

d) Anti micro filarial activity:

In India around 48 million people are affected by filariasis. It is a vector – borne parasitic disease a adult worm lives in the infected individual for several years. Vitex negundo plant extract as antifilarial activity against Setaria cervi. [8]

e) Anti-oxidant activity:

Free radicals causes cell damage due to the singlet oxygen or hydrogen peroxide leads to oxidative stress. This stress plays an important role in the pathogenesis of certain cancers and atherosclerosis. Fruits, vegetables and herbs are rich sources of antioxidants such as phenolic compounds, flavonoids, carotenoids, tocopherol and ascorbic acid.
Some of the antioxidant present in vitex negundo are Catechin, Epicatechin, Quercetin, Myricetin, Kaempferol, Naringenin, β-carotene, and Tocopherol. Contents of the leaves are: 

| S.NO | ACTIVITY | ACTION AGAINST | REFERENCES |
|------|----------|----------------|------------|
| 1    | Anti bacterial | Gram negative bacteria: Escherichia coli, Pseudomonas aeruginosa, Vibrio cholera, Salmonella typhi, Shigella boydii, Shigella dysenteriae, Vibrio mimicus, Salmonella paratyphi, Vibrio parahemolyticus | [12,13] |
| 2    | Anti pyretic | Yeast induced hyperpyrexia | [7] |
| 3    | Anti filarial | Setaria cervi (microfilarial parasite) Brugia malayi | [8,11] |
| 4    | Larvicidal and mosquito repellent | Culex quinquefasciatus, Anopheles stephensi, Aedes aegypti, Culex tritaeniorhynchus Andrographis paniculata | [14,15] |
| 5    | Anti fungal | C.albicans, C.krusei, C.parapsilosis, C. tropicalis, C.glabrata, Aspergillus flavus, Microsporum canis and Fusarium solani | [16,17] |
| 6    | Anti inflammatory | Carrageenin induced hind paw | [1] |

**Activities of Vitex negundo**

- **f) Hepatoprotective Activity:** Vitex negundo contains neugendoside and agnuside compounds are used to treat hepatic diseases. [4]

- **g) Anticonvulsant activity**

The petroleum ether and butanol leaf extract have shown protection against electro shock seizures, whereas root extract has shown little effect. Petroleum ether extract of root could only provide protection against leptazole induced convulsions, whereas melatonin leaf extract showed significant protection against both strychnine and leptazole induced convulsions. [10]

**IV. PHYTOCHEMICALS**

**a) Leaves:**

Aromadendrene oxide-(1) 4-Hexadecanoic acid 4H-Pyran-4-one, 2,3-dihydro-3,5-dihydroxy-6-methyl-2,4-Pentadien-1-ol, 3-propyl-, (2Z)-D-Glucose, 6-O-D-galactopyranosyl-Ascaridole epoxide,d-Mannose, Butane, 1,1-dithioxy-3-methyl, Hexanoic acid, ethyl ester Propane, 1,1,3-triethoxy 2,3-Dihydrothiophene 1,1-dioxide, Ledol. Ethyl is-allo-ocotate (7-Isopropenyl-4,5-dimethyloctahydroinden-4-yl) methanol, Azulene, 1,4-dimethyl-7(1-methylthyl), Ethanol, 2-(9-octadecenylxoy), (Z)-4,9-Decadienoic acid, 2-nitro-, ethyl ester, Hexadecanoic acid, ethyl ester 10, 13-Octadeacynoic acid, methyl ester, 4-Decynoic acid, methyl ester. Carylphyllene, Benzoic acid, 2-Methyl-4-(2,6,6-trimethylcyclohex-1-enyl) but-2-en-1-ol, 6,9,12,15-Docosatetraenoic acid, methyl ester, Phytol, Ethanol, 2-(9,12-octadecadienylxoy), (Z,Z)-9,12,15-Octadecatrienoic acid, (Z,Z)-12-Bromo-13-hydroxy-2,5,9,13-tetramethyltetradeca-4,8-dienoic acid, methyl ester, Vitamin E, neugendoside, agnuside, vitaegnoside.

1H-indene, cyclododecanol, patchouline, 1,2-dihexylcyclopentene-3-carboxylic acid, 2-heptenoic acid, (+)– armonadendrene, trans-caryophyllene, 7-oxabicyclo heptane, cyclohexane, farnesol, pentadecane and 1-octanol. Tetramethoxyflavone, trimethoxyflavone, ascorosin and 5-glucosylharmoside, casticin, chrysopolenol D, luteolin,isoxyientin, sabinene, p-cymene, M-phelladune, N-terpine, global and viridifloridol4; mono and sesquiterpenes5; viridifloridol, M-eudesmol and M-caryophyllene.

Pentacyclic triterpenoids, betulinic acid (3, hydroxyup-20-(29)-en-28-oic acid), and ursolic acid(2,3-hydroxyurs-12-en-28-oic acid). [20]

**b) Seeds:**

Ono3β-Acetoxyolean-12-en-27-oic acid; 2α, 3α-dihydroxyoleana-5,12-dien-28-oic acid; 2β,3α-diacetoxyoleana-5,12-dien-28-oic acid; 2α, 3β-diacetoxy-18-hydroxyoleana-5,12-dien-28-oic acid 6-Hydroxy-4-(4-hydroxy-3-methoxy-phenyl)-3-hydroxyethyl-7-methoxy-3,4-dihydro-2-naphthaldehyde β-Sitosteral, p-hydroxybenzoic acid, n-tritriacontane, nhenriciacontane, n-pentatriacontane, and n-nonacosane. [21]
Phenyldehydroanaphthalene-type lignan, vitudoin A, a new phenylnaphthalene-type lignan alkaloid, vitoedamine A, and a new trinorlabdane-type diterpene, vitudoin B.[22]

c) Essential oil:
Ethyl-hexadecenoate; α-selinene, germacrene-4-ol; caryophyllene epoxide, (E)-nerolidol, β-selinene, α-cedrene, germacrene D, hexadecanoic acid, p-cymene and valencene, viridiflorol, β-caryophyllene, sabi nene, 4-terpineol, γ-terpinene, caryophyllene oxide, 1-octen-3-ol, and globulol. [23]

V. CONCLUSION

| S.NO | COMPOUND | ACTIVITY |
|------|----------|----------|
| 1    | 4H-Pyr-an-4-one, 2,3,5-dihydro-3,5-dihydroxy-6-methyl- | Antimicrobial, anti-inflammatory |
| 2    | D-Glucose,6-O-_, Dgalactopyranosyl- | Preservative |
| 3    | Hexadecanoic acid, ethyl ester | Antioxidant, hypcholesterolemic, nematicide, pesticide, anti-androgenic flavor, hemolytic, 5-Alpha reductase inhibitor |
| 4    | Caryophyllene | Anti-tumor, analgesic, antibacterial, antiinflammatory, sedative, fungicide |
| 5    | Benzoic acid, 3-hydroxy | Antimicrobial |
| 6    | Ledol | Antimicrobial, anti-inflammatory |
| 7    | Aromadendrene oxide-(1) | Anti-tumor, analgesic, antibacterial, antiinflammatory, sedative |
| 8    | n-Hexadecanoic acid | Antioxidant, hypcholesterolemic nematicide, pesticide, anti-androgenic flavor, hemolytic, 5-Alpha reductase inhibitor |
| 9    | Phytol | Antimicrobial, anticancer, antiinflammatory, diuretic |
| 10   | Vitamin E | Antiaging, analgesic, antiabaticantinflammato ry, antioxid ant, antidermatitic, antileukemic, antitumor, anticancer, hepatoprotective, hypocholesterolemic, |

Activity of Phytochemicals[24]

| S.NO | COMPOUND | ACTIVITY |
|------|----------|----------|
| 1    | 4H-Pyr-an-4-one, 2,3,5-dihydro-3,5-dihydroxy-6-methyl- | Antimicrobial, anti-inflammatory |
| 2    | D-Glucose,6-O-_, Dgalactopyranosyl- | Preservative |
| 3    | Hexadecanoic acid, ethyl ester | Antioxidant, hypcholesterolemic, nematicide, pesticide, anti-androgenic flavor, hemolytic, 5-Alpha reductase inhibitor |
| 4    | Caryophyllene | Anti-tumor, analgesic, antibacterial, antiinflammatory, sedative, fungicide |
| 5    | Benzoic acid, 3-hydroxy | Antimicrobial |
| 6    | Ledol | Antimicrobial, anti-inflammatory |

| 9    | Phytol | Antimicrobial, anticancer, antiinflammatory, diuretic |
| 10   | Vitamin E | Antiaging, analgesic, antiabaticantinflammato ry, antioxid ant, antidermatitic, antileukemic, antitumor, anticancer, hepatoprotective, hypocholesterolemic, |

Vitex negundo is a natural gift from god it possess wide application in traditional medicines. All parts of the plants include leaf, roots, flowers, seeds and barks are used to treat many infectious diseases. It contains multiple numbers of phytochemicals as secondary metabolites, each plays the unique role to treat diseases. Caryophyllene, ledol, nishindaside, mussaenosidic acids, vitudoin, negundin and vitexin are some of the important phytochemicals in the plants.

This plant is known to possess anti-inflammatory, anti-microbial, anti pyretic, anticonvulsunt, insecticidal and it is highly hepatoprotective. Besides, this medicinal properties it is also act as mosquito repellent and larvicidal activity.

VI. ACKNOWLEDGEMENT

The author express their gratitude towards the host institution Dr. N.G.P. Arts and Science College, Management, Principal, Deans, Head of the Department, Guide and all other staffs of Department of Biotechnology for rendering all the facilities for support. Communication no: Dr NGPASC 2019-2020 BS017.
